

Contents

CHAPTER 1. INTRODUCTION	1
Development of Ultra High Energy Density Heat Sources and Their Application to Heat Processing <i>Y. Arata</i>	3
High Technology for Materials Processing Based on Welding <i>Y. Arata</i>	28
CHAPTER 2. DEVELOPMENT OF ULTRA HIGH ENERGY DENSITY HEAT SOURCE	51
Electron Beam	52
The Transtron Accelerator S-1 <i>M. Okada and Y. Arata</i>	53
Plasma Electron Beam of Very High Current <i>Y. Arata, M. Tomie and Y. Katayama</i>	61
Some Fundamental Properties of Nonvacuum Electron Beam <i>Y. Arata and M. Tomie</i>	71
100-KW Class Electron Beam Welding Technology—Welding Apparatus and Some Aspects as a Heat Source <i>Y. Arata and M. Tomie</i>	91
Development and Application of a Strong Focusing Electron Beam Gun With Multi-Stage Electromagnetic Accelerating Units <i>Y. Arata and M. Tomie</i>	95
Laser Beam	105
Some Fundamental Properties of High Power CW Laser Beam as a Heat Source <i>Y. Arata and I. Miyamoto</i>	106
High Power Electric Discharge CO ₂ Lasers <i>Y. Arata, I. Miyamoto, N. Kawanishi, T. Komori and A. Takayasu</i>	128
Plasma Beam	131
Magnetic Control of Arc Plasma and Its Application for Welding <i>Y. Arata and H. Maruo</i>	132
Generation of Point Arc and Its Characteristics <i>Y. Arata and K. Inoue</i>	151
Fundamental Characteristics of Stationary Plasma Arc in Gas Tunnel <i>Y. Arata and A. Kobayashi</i>	157
Development of Gas Tunnel Type High Power Plasma Jet <i>Y. Arata and A. Kobayashi</i>	165

CHAPTER 3. FUNDAMENTAL CHARACTERISTICS OF ULTRA HIGH ENERGY DENSITY HEAT SOURCE	175
Focusing	176
Evaluation of Beam Characteristics by the AB Test Method <i>Y. Arata</i>	177
Shape Decision of High Energy Density Beam <i>Y. Arata, M. Tomie, K. Terai, H. Nagai and T. Hattori</i>	194
Focusing Characteristics of High Energy Density Beam <i>Y. Arata, T. Ishimura and I. Miyamoto</i>	211
Some Fundamental Properties of High Power Laser Beam as a Heat Source (Report 1: Beam Focusing Characteristics of CO ₂ Laser) <i>Y. Arata and I. Miyamoto</i>	217
Wall-Focusing Effect of Laser Beam <i>Y. Arata and I. Miyamoto</i>	226
Heating of Material.....	233
Some Fundamental Properties of High Power Laser Beam as a Heat Source (Report 2: CO ₂ Laser Absorption Characteristics of Metal) <i>Y. Arata and I. Miyamoto</i>	234
Some Fundamental Properties of High Power Laser Beam as a Heat Source (Report 3: Metal Heating by Laser Beam) <i>Y. Arata and I. Miyamoto</i>	245
Theoretical Analysis of Weld Penetration Due to High Energy Density Beam <i>Y. Arata and I. Miyamoto</i>	263
Investigation on Moving Line Heat Source—Numerical Calculation of Temperature Distribution <i>Y. Arata and K. Inoue</i>	269
High Energy Density Plasma Beam	275
Achievement of High Energy Density for Plasma Beams <i>Y. Arata</i>	276
Magnetic Control of Plasma Arc Welding—On the Pressure Distribution of Plasma and Its Effect on Key-Hole Action <i>Y. Arata, H. Maruo, Y. Hirata and Y. Horio</i>	284
Concept of Vortex Gas Tunnel and Application to High Temperature Plasma Production <i>Y. Arata</i>	293
High Power Microwave Discharge in Atmospheric Hydrogen Gas Flow <i>Y. Arata, S. Miyake and A. Kobayashi</i>	295
Pulsed High Current Heating of a Microwave Plasma at Atmospheric Pressure <i>Y. Arata, S. Miyake, M. Ushio and Y. Yoshioka</i>	301

CHAPTER 4. PHYSICAL CHARACTERISTICS OF ULTRA HIGH ENERGY DENSITY BEAM WELD ZONE..... 309

Hardness and Defect of Weld Zone 310

 100KW Class Electron Beam Welding Technology—Characteristics of Deep Penetration Bead and Its Analysis
 Y. Arata, M. Tomie and A. Kohyama 311

 Quench Hardening and Cracking in Electron Beam Weld Metal of Carbon and Low Alloy Hardenable Steels
 Y. Arata, F. Matsuda and K. Nakata 319

 Weldability Concept on Hardness Prediction
 Y. Arata, K. Nishiguchi, T. Ohji and N. Kohsai 332

 Study on Characteristics of Weld Defect and Its Prevention in Electron Beam Welding—Characteristics of Weld Porosities
 Y. Arata, K. Terai and S. Matsuda 342

Fracture Path Transition Temperature 353

 Mechanical Properties on Electron Beam Welds of Constructional High Tension Steels (1)
 Y. Arata, F. Matsuda, Y. Shibata, S. Hozumi, Y. Ono and S. Fujihira 354

 Mechanical Properties on Electron Beam Welds of Constructional High Tension Steels (2)
 Y. Arata, F. Matsuda, Y. Shibata, S. Hozumi, Y. Ono and S. Fujihira 370

Dynamic Behavior of Welding and Cutting 377

 A Study on Dynamic Behaviours of Electron Beam Welding—The Observation by a Fluoroscopic Method
 Y. Arata, E. Abe and M. Fujisawa 378

 Tandem Electron Beam Welding—Analysis of Front Wall of Beam Hole by Beam Hole X-ray Observation Method
 Y. Arata, N. Abe and S. Yamamoto 387

 Dynamic Behavior of Laser Welding
 Y. Arata, H. Maruo, I. Miyamoto and S. Takeuchi 397

 Beam Hole Behavior during Laser Beam Welding
 Y. Arata, N. Abe and T. Oda 407

 Dynamic Behavior in Laser Gas Cutting of Mild Steel
 Y. Arata, H. Maruo, I. Miyamoto and S. Takeuchi 415

CHAPTER 5. APPLICATION OF ULTRA HIGH ENERGY DENSITY HEAT SOURCE..... 427

Electron Beam Welding 428

 Narrow Gap High Energy Density Beam Welding—Principle
 Y. Arata 429

100kW Class Electron Beam Welding Technology—Fundamental Research on Horizontal Electron Beam Welding
Y. Arata and M. Tomie 431

Electron Beam Welding of High Strength Aluminum Alloy
Y. Arata, M. Ohsumi and Y. Hayakawa 441

Insert-type Electron Beam Welding Technology—Characteristics of Insert-type Welding
Y. Arata, K. Terai, H. Nagai, T. Aota, I. Futami and S. Shimizu..... 448

Study on Local Vacuum Electron Beam Welding
K. Shinada, K. Kondo, S. Satoh, T. Shimoyama, G. Takano, M. Minami, T. Tanaka and Y. Arata 467

Fundamental Studies on Electron Beam Welding of Heat-resistant Superalloys for Nuclear Plants—Effect of Welding Conditions on Some Characteristics of Weld Bead
Y. Arata, K. Terai, H. Nagai, S. Shimizu, T. Aota 473

Tandem Electron Beam Welding
Y. Arata and E. Nabegata 481

Laser Beam Welding 491

 Mechanism of Bead-Transition in Laser Welding
 I. Miyamoto, H. Maruo and Y. Arata 492

 The Role of Assist Gas in CO₂ Laser Welding
 I. Miyamoto, H. Maruo and Y. Arata 498

 CO₂ Laser Welding of Ceramics
 H. Maruo, I. Miyamoto and Y. Arata 506

 Fundamental Phenomena during Vacuum Laser Welding
 Y. Arata, N. Abe, T. Oda and N. Tsujii..... 517

Laser Gas Cutting 525

 New Laser-Gas-Cutting Technique for Stainless Steel
 Y. Arata, H. Maruo, I. Miyamoto and S. Takeuchi 526

Laser Surface Treatment 537

 Surface Hardening of Titanium by Laser Nitriding
 S. Katayama, A. Matsunawa, A. Morimoto, S. Ishimoto and Y. Arata 538

 Condition Setting Method Utilizing Data Base System in CO₂ Laser Surface Hardening—Fundamental Concept
 Y. Arata, K. Inoue and S. Matsumura 546

 Application of Laser for Material Processing—Heat Flow in Laser Hardening
 Y. Arata, K. Inoue, H. Maruo and I. Miyamoto 550

 Effect of Heating Condition in Laser Hardening Carbon Steel
 H. Maruo, I. Miyamoto, T. Ishida and Y. Arata 568

Application of Plasma Beam	581
Hydrogen Content in Arc Atmosphere of Water Curtain Type Underwater Argon Arc Welding <i>Y. Arata, M. Hamasaki and J. Sakakibara</i>	582
Corrosion Behavior of Plasma-Sprayed Ceramic Coated Stainless Steel at High Humidity <i>Y. Arata, A. Ohmori, J. Morimoto, T. Kudo and M. Kishida</i>	589
The Present State of Ceramic Spraying in Japan <i>Y. Arata, A. Ohmori, J. Morimoto, K. Kishida and T. Kudoh</i>	593
 LIST OF OTHER IMPORTANT PAPERS CONCERNING ULTRA HIGH ENERGY DENSITY BEAM	 603
 YOSHIAKI ARATA [personal history and accomplishments]	 613
 INDEX	 615
