|--|-----------|
| Preface | xi |
| Acknowledgments | xiii |
| Chapter 1 Introduction | 1 |
| General Description of Electromagnetic Pumps and Their Uses | 1 |
| Historical Origin of Electromagnetic Pumps | 3 |
| Related Concepts | 3 |
| EM Flowmeters | 3 |
| Magnetohydrodynamic Power Generation | 4 |
| Magnetohydrodynamic Pumping of Molten Metal | 5 |
| References | 6 |
| Chapter 2 Basic Principles of EM Pump Operation | 8 |
| Production of Force | 8 |
| EM Pump Classifications | 11 |
| References | 32 |
| Chapter 3 Factors Affecting EM Pump Selection | 33 |
| Physical Properties of the Liquid | 34 |
| Resistivity | 34 |
| Viscosity | 35 |
| Density | 35 |
| Volumetric Flow Rate | 36 |
| Pressure Rise | 37 |
| Temperature of the Liquid Metal | 39 |
| Heat Transfer Analyses | 40 |
| References | 55 |
| Chapter 4 Design Procedure for the Helical-Rotor Electromagnetic Pump | 56 |
| Helical-Rotor EM Pump with Salient-Pole Windings | 56 |
| Helical-Rotor EM Pump with Non-Salient Pole Rotor | 75 |
| Helical-Rotor EM Pump with Helical Flow Passage | 87 |
| Helical-Rotor EM Pump with Stationary Field Coils | 110 |
| References | 116 |

| | |
|---|------------|
| Chapter 5 Design Procedure for the Flat Linear Induction Pump | 118 |
| Addendum: Derivation of Expression for X_m | 140 |
| References | 142 |
| Chapter 6 Design Procedure for a Single-Sided Linear Induction Pump | 143 |
| Addendum: Derivation of the Factor 0.435 in the Equation for Efficiency | 152 |
| References | 153 |
| Chapter 7 Design Procedure for the Annular Linear Induction Pump | 154 |
| Addendum: Derivation of Expression for X_m | 174 |
| References | 176 |
| Chapter 8 Design Procedure for the AC Induction Pump with Helical Flow Passage | 178 |
| Addendum: Derivation of Expressions for X_m , ΔP , and R_F | 199 |
| References | 209 |
| Chapter 9 Introduction to Design Procedures for Conduction Electromagnetic Pumps | 211 |
| References | 231 |
| Appendix A Application Notes | 232 |
| EM Pump Control | 232 |
| DC Conduction EM Pumps | 232 |
| AC Conduction EM Pumps | 233 |
| Power Factor Correction for Single-Phase Conduction EM Pumps | 235 |
| Induction EM Pumps | 242 |
| Power Factor Correction for Three-Phase Induction EM Pumps | 244 |
| EM Pump Preheat and Meltout | 245 |
| DC Conduction EM Pumps | 245 |
| AC Conduction EM Pumps | 246 |
| Linear Induction Pumps | 246 |
| Helical Rotor EM Pumps | 247 |
| Derivation of Equations for Sizing Capacitors for Power Factor Correction | 247 |
| | 249 |

| | |
|---|------------|
| Appendix B Magnetohydrodynamic Power Generation | 255 |
| Liquid Metal Magnetohydrodynamics | 257 |
| Cycles | 258 |
| The Brayton Cycle | 258 |
| The Rankine Cycle | 259 |
| The Open Cycle | 260 |
| Components | 260 |
| Generators | 260 |
| Separators | 264 |
| Mixers, Nozzles, and Diffusers | 266 |
| Typical Applications | 267 |
| Nuclear | 267 |
| Coal | 268 |
| Solar | 269 |
| AC MHD Generators | 270 |
| Induction | 271 |
| Conduction | 273 |
| Slug | 273 |
| Wave | 274 |
| Plasma Magnetohydrodynamics | 274 |
| Cycles | 274 |
| Components | 276 |
| References | 281 |
| Appendix C Listing and Sample Calculation for Helical-Rotor EM Pump | 285 |
| Appendix D Listing and Sample Calculation for Helical Passage Rotary EM Pump (HEDREM) | 291 |
| Appendix E Listing and Sample Calculation for Flat Linear Induction EM Pump (FLIP) | 299 |
| Appendix F Listing and Sample Calculation for Annular Linear Induction EM Pump (ALIP) | 307 |
| Appendix G Listing and Sample Calculation for Induction Pump with Helical Flow Passage (HIP) | 315 |
| Appendix H Listing and Sample Calculation for DC Conduction EM Pump | 322 |
