

## **Contents and Subject Index**

|   |   |    |
|---|---|----|
| I.  | INTRODUCTION . . . . .  | 1  |
| II.   | EXPERIMENTAL APPARATUS . . . . .  | 3  |
| II.1  | Introduction . . . . .  | 3  |
| II.2  | Plasma Volume Synthesis System . . . . .  | 7  |
| II.3  | Modified System for Surface Studies . . . . .   | 18 |
| II.4  | Ultra High Vacuum Surface Modification System . . . . .                                   | 23 |
| III.  | PREPARATION AND CHARACTERIZATION OF PLASMA<br>POLYMERIZED POLYVINYLFERROCENE . . . . .    | 26 |
| III.1   | Coulometry for Characterization of Electroactive Polymer<br>Modified Electrodes . . . . . | 28 |
| Determination of Electrochemical Coverage . . . . .                                       | 28  |    |
| Coulometry for Evaluation of Thermodynamics of Electro-<br>active Polymer Films . . . . . | 36  |    |
| References . . . . .  | 40  |    |
| III.2   | Ellipsometric Measurement of PPVF Film Thickness and<br>Refractive Index . . . . .        | 42 |
| References . . . . .  | 53  |    |
| III.3   | Experimental Section . . . . .  | 55 |
| Materials and Reagents . . . . .  | 55  |    |
| Solvents . . . . .  | 55  |    |
| Acetonitrile . . . . .  | 55  |    |
| Methylene Chloride . . . . .  | 55  |    |
| Methanol . . . . .  | 55  |    |
| Aqueous Solutions . . . . .   | 55  |    |
| Supporting Electrolytes . . . . .   | 55  |    |
| Tetrabutylammonium Perchlorate (TBAP) . . . . .   | 55  |    |
| Tetraethylammonium p-Toluene Sulfonate (TEApTs) . . . . .                                 | 56  |    |

|  |     |   |     |
|--|-----|---|-----|
| Tetrabutylammonium Hexafluorophosphate (TBAPF <sub>6</sub> ) . . . . .   | 56  | III.7 Transport Kinetics in PPVF Film Electrodes. . . . . | 211 |
| Lithium Perchlorate (LiClO <sub>4</sub> ). . . . .   | 56  | Break-In Behavior . . . . .                               | 211 |
| Reagents . . . . .   | 56  | Charge-Transport Kinetics. . . . .                        | 218 |
| Ruthenium Tris-Bipyridyl Bis-Hexafluorophosphate<br>[Ru(bipy) <sub>3</sub> (PF <sub>6</sub> ) <sub>2</sub> ] . . . . .                         | 56  | Substrate Transport Through PPVF Films . . . . .          | 229 |
| Vinylferrocene . . . . .   | 57  | Conclusions . . . . .                                     | 231 |
| Hydroxymethyl Ferrocene (HMF) . . . . .  | 57  | References. . . . .                                       | 235 |
| 9,10 Diphenylanthracene (DPA). . . . .   | 57  | IV. PLASMA VOLUME SYNTHESIS STUDIES. . . . .              | 236 |
| Substrates . . . . .   | 57  | APPENDIX I. PUBLICATIONS AND PRESENTATIONS. . . . .       | 239 |
| Choice of Substrates . . . . .   | 57  | Publications . . . . .                                    | 239 |
| Glassy Carbon (GC) . . . . .   | 58  | Papers in Preparation . . . . .                           | 239 |
| Silicon . . . . .  | 59  | Presentations . . . . .                                   | 240 |
| Platinum (Pt) . . . . .  | 60  | APPENDIX II. PERSONNEL. . . . .                           | 242 |
| Polishing Procedure . . . . .  | 60  | APPENDIX III. ORGANIC PLASMA CHEMISTRY. . . . .           | 243 |
| Characterization Apparatus and Procedures . . . . .  | 64  | <i>Larry L. Miller</i>                                    |     |
| Electrochemical Characterization Apparatus and<br>Procedures . . . . .   | 64  | Plasmas . . . . .   | 244 |
| Ellipsometric Apparatus and Procedures . . . . .   | 70  | Equipment for RF Reactions. . . . .                       | 247 |
| Other Apparatus . . . . .  | 72  | Reaction Products. . . . .                                | 248 |
| Plasma Deposition Apparatus and Procedure for PPVF<br>Deposition . . . . .   | 73  | RF Cyanation, A Case Study. . . . .                       | 251 |
| Plasma Deposition Procedure. . . . .   | 79  | Synthetic Aspects . . . . .                               | 251 |
| Evaluation of Reactor Performance and Deposition<br>Procedure. . . . .   | 83  | Cyanation Mechanisms. . . . .                             | 254 |
| References . . . . .   | 93  | The Importance of the Electrons . . . . .                 | 260 |
| III.4 Characterization of PPVF Films . . . . .   | 94  | Conclusion. . . . .                                       | 264 |
| Surface Characterization. . . . .  | 94  | References. . . . .                                       | 267 |
| Bulk Characterization. . . . .   | 106 |   |     |
| Solubility and Stability of PPVF Films . . . . .   | 121 |   |     |
| Conclusions . . . . .  | 128 |   |     |
| References . . . . .   | 131 |   |     |
| III.5 X-Ray Photoelectron Spectroscopic and Secondary Ion Mass<br>Spectrometric Thin Film Analysis of PPVF. . . . .                            | 133 |   |     |
| Sputtering Behavior of PPVF. . . . .   | 133 |   |     |
| The Damage Process as Studied by XPS. . . . .  | 139 |   |     |
| Comparison of Interface Definition Using AES vs SIMS in<br>the Thin Film Analysis of PPVF on Single Crystal Silicon . .                        | 148 |   |     |
| The Relationship Between Ion Dose Required to Reach the<br>PPVF/Si Interface and Ellipsometrically Determined PPVF<br>Film Thickness . . . . . | 152 |   |     |
| References . . . . .   | 157 |   |     |
| III.6 Redox Thermodynamics of PPVF Film Conversion: Compari-<br>sons to the Linear Polyvinylferrocene System . . . . .                         | 158 |   |     |
| Redox Thermodynamics of PPVF Film Conversion . . . . .   | 158 |   |     |
| Redox Thermodynamics of LPVF Film Conversion . . . . .   | 176 |   |     |
| Region II: Redox Site Aggregation Model . . . . .  | 183 |   |     |
| Region I: Ion Exchange Membrane Model . . . . .  | 205 |   |     |
| References . . . . .   | 209 |   |     |
