

## CONTENTS

Preface	v
CHAPTER 1: INTRODUCTION	1
1.1 An Example of Masking and Plasma Etching Procedure in Integrated Circuit Production	1
1.2 Scope of Study and Experimental Work	6
CHAPTER 2: PLASMA EXCITATION AND REACTOR DESIGN	9
2.1 Plasma Condition	9
2.2 The Barrel Reactor	12
2.3 The Planar Reactor	15
2.4 General Plasma Parameters	23
a) Gas pressure	24
b) RF power input	27
c) Gas flow	30
d) Loading effects	32
e) Temperature	34
2.5 Some Basic Rules for the Design of Planar Reactor	37
2.6 Reactive Ion Etching (RIE)	40
2.7 Other Etching Systems	43
a) The ion miller	43
b) Reactive ion beam etching (RIBE)	44
CHAPTER 3: SILICON AND SILICON DIOXIDE ETCHING IN PLASMAS	49
2.1 General Chemistry	49
3.2 Typical Process Requirements	51
3.3 Fluorine Rich Plasmas	52
3.3.1 Oxygen additions	52
3.3.2 Other work	58

3.4	Fluorine Deficient Plasmas	60
3.4.1	Hydrogen addition	60
3.4.2	Surface analysis and carbon	62
3.4.3	Polymer sputtering	63
3.4.4	Carbon free gases	67
3.4.5	Electrode effects	68
3.4.6	RIBE and sputtering	71
3.5	Ion vs. Free Radical In Plasma Etching	72
3.5.1	Chemisorption	73
3.5.2	Ion impact	75
3.5.3	Method of detecting undercut	82
3.5.4	He additions to $CF_4$ plasma	82
3.5.5	Effects of excitation frequency and pressure using a $CF_4/O_2$ plasma	83
3.6	Carbon Containing Mixed Halogens ( $CF_xX_n$ ) In Plasmas	85
3.7	Silicon Etching Using Carbon Tetrachloride and Chlorine Plasmas	88
CHAPTER 4:	ALUMINIUM ETCHING IN CHLORINATED PLASMAS	95
4.1	Process Requirements	95
4.2	Processes Used for Etching	96
4.3	Aluminium Etching with Silicon Tetrachloride	103
4.4	Possible Mechanisms in Aluminium Etching	103
CHAPTER 5:	THE PLASMA ETCHING OF III/V COMPOUND SEMICONDUCTORS	107
5.1	Why III/V Compound Semiconductors?	107
5.2	Process Considerations	107
5.3	Plasma Conditions Used for Etching III/V Compounds	107
CHAPTER 6:	OPERATING FREQUENCY AND THE PLASMA	111
6.1	The Equivalent Circuit	111
6.1.1	Matching network	112
6.2	Applied Potential and Conductance Changes in Plasmas and the Corresponding Changes in Etching Properties	114

6.3	Sustaining Plasmas at Low and High Frequency	128
6.4	Summary of Sustaining Mechanisms	135
6.5	System Voltage Distribution	137
CHAPTER 7:	PROBE CHARACTERISTICS AND PLASMA MEASUREMENTS OF AN ELECTROTECH PLANAR PLASMA ETCHER	143
7.1	Introduction	143
7.2	Background	144
7.2.1	Probe theory and the single probe	146
7.2.2	Double probe	150
7.2.3	Limitations	157
7.3	Experimental Work and Results	158
7.3.1	Apparatus	158
7.3.2	Single probe experiments	159
7.3.3	Symmetrical double probe study	167
7.4	Results and Discussion	175
7.4.1	Single probe work	175
7.4.2	Double probe work	187
7.5	Conclusions on Probe Uses	201
CHAPTER 8:	THE RF VOLTAGE/CURRENT CHARACTERISTICS AND RELATED DC NEGATIVE BIAS PROPERTIES OF AN ELECTROTECH FLAT BED PLANAR PLASMA ETCHER	203
8.1	Introduction	203
8.2	Experimental Work	203
8.2.1	Apparatus	203
8.2.2	Negative bias potential to ground	205
8.2.3	RF voltage waveform and dependence on rf current	209
8.2.4	The measurement of the rf current through a dummy ground electrode	214
8.2.5	RF current and voltage display for phase comparison	217
8.3	Discussion	217
8.3.1	Voltages and the symmetrical system	217
8.3.2	Influence of bias on etch rate	220
8.3.3	The voltage plots	227
8.3.4	The multiplication process	228

8.3.5 Ion calculation and floating potential estimation	234
8.3.6 Practical solutions	237
CHAPTER 9: METHODS OF REDUCING THE ETCH RATE OF POSITIVE PHOTO-RESIST MASKS DURING PLASMA ETCHING	241
9.1 Introduction	241
9.1.1 The process for photoresist mask	241
9.1.2 The criteria for photoresists	242
9.1.3 The plasma process	243
9.1.4 Cross-linking and scope of work	245
9.2 Background to Photoresist Chemistry	247
9.3 Experimental Work	252
9.3.1 Wafer construction	252
9.3.2 Mask 407	253
9.3.3 Measurement of resist loss	255
9.4 Discussion of Pre-Treatments	256
9.4.1 Heat pre-treatment	256
9.4.2 Plasma pre-treatment	263
9.4.3 UV pre-treatment	272
9.4.4 Chemical pre-treatment	275
9.4.5 Ion impact pre-treatment	277
9.4.6 Electron beam pre-treatment	279
9.5 Miscellaneous Resists	293
9.6 Comparison of Resist Pre-Treatment Techniques and Summary	296
9.7 Further Work	302
REFERENCES	303
SUBJECT INDEX	313
