

CONTENTS OF VOL. II

SECTION 1:CLOSED-CYCLE MHD WITH GASEOUS WORKING FLUIDS (cont.)

1-h: SHOCK WAVES

Theoretical and experimental investigation of a non-equilibrium plasma in an MHD channel (SM-107/4)	711
A. Veefkind, J.H. Blom and L.H.T. Rietjens	
Electrical processes in a flowing plasma with cold electrodes (SM-107/13)	725
E. Distefano and N. Fraidenraich	
Formation of a quasi-neutral plasma in a hydrodynamic channel flow (SM-107/33)	733
H.E. Wilhelm and B. Zauderer	
Etude théorique et expérimentale, en tube à choc, des phénomènes accompagnant la mise hors d'équilibre dans un générateur MHD en cycle fermé (SM-107/123)	745
J.P. Petit, J.P. Caressa et J. Valensi	
Структура сверхзвукового потока проводящего газа в попечном магнитном поле при съеме индуцированной ЭДС и исследование вольтамперных характеристик (SM-107/157).....	751
С.Г. Зайцев, Е.В. Лазарева, Е.И. Чеботарева и Э.К. Чекалин	
Неравновесный нагрев электронов при движении ударной волны через магнитное поле (SM-107/188)	777
Р.В. Васильева, К.В. Донской, Б.М. Добрынин и В.А. Шингаркина	

1-i: POWER GENERATION EXPERIMENTS

The M.I.T. non-equilibrium MHD generator (SM-107/25)	789
J.L. Kerrebrock and M.A. Hoffman	
A large-scale non-equilibrium MHD generator (SM-107/31)	807
B. Zauderer and E. Tate	
High Hall coefficient experiments in a large disc generator (SM-107/34)	825
J.F. Louis	
Aspects technologiques et constructifs d'un banc d'essai pour MHD (SM-107/44)	851
E. Fischhoff et P. Zettwoog	
Résultats d'expériences de conversion MHD à gaz rare (SM-107/50)	873
R. Bertrand, J.C. Coche, J.P. Jacquemin, J. Le Bronec, C. Vavasseur et P. Zettwoog	
Experimental study on MHD generators with segmented electrodes at high Hall parameters (SM-107/85)	881
S. Yano, T. Hiramoto and H. Shirakata	

The Toshiba blow-down MHD test facility, and experiments on non-equilibrium ionization (SM-107/89)	897
Y. Yamamoto, H. Ogiwara, S. Shioda, M. Miyata, M. Goto and E. Kasahara	
The first measurements at the ARGAS test loop (SM-107/107)	909
T. Bohn and G. Noack	
Closed-cycle MPD experiments with applied electric and magnetic fields (SM-107/126)	925
I.R. McNab, R. Brown and M.G. Haines	
Экспериментальное исследование модели МГД-генератора с неравновесной плазмой (SM-107/167)	939
Н.М. Масленников, В.Н. Германюк и М.А. Новгородов	
Subsonic constant-area MHD generator experiments with the CNEN blow-down loop facility (SM-107/197)	957
E. Bertolini, M. Gasparotto, P. Gay and R. Toschi	
Performance of the CNEN MHD blow-down loop facility (SM-107/201)	987
E. Bertolini, R. Brown, M. Gasparotto, P. Gay and R. Toschi	
Design and operation of an experimental closed-loop magnetoplasmadynamic energy conversion system (SM-107/204) ..	1017
E. Talaat	

1-j: UNCONVENTIONAL WORKING FLUIDS AND CONCEPTS

An impulse induction MHD generator having a magnetic field with a radial component (SM-107/3)	1043
J. Légo	
Nuclear properties of a reactor used for nuclear seeding of an MHD plasma (SM-107/22)	1061
G.R. Dalton, G.H. Ellis and D.D. Orvis	
Theoretical and experimental study of the EGD power generator (SM-107/99)	1079
G. Małaczyński and M.P. Brunné	
Experiments on a striated-flow induction synchronous MHD generator (SM-107/101)	1097
J. Milewski, J. Stańco and J. Samulski	
Experiment and theory of the ionization and recombination kinetics in plasmas (${}^3\text{He}$) produced through neutron irradiation (SM-107/102)	1107
W.H. Ellis, H.E. Wilhelm, G.R. Dalton, H.G. Cofer and D.D. Orvis	
High-temperature energy systems with plasma reactors and inductive magnetoplasmadynamic converters (SM-107/104)	1133
W. Peschka and S. Kelm	
Experimental work on inductive magnetoplasmadynamic converters (SM-107/105)	1151
W. Peschka, W. Seeger and H. Eitel	

Experimental and theoretical studies of gaseous suspensions of thermionic emitting particles for use as MHD working fluids (SM-107/127)	1161
B. Waldie and I. Fells	
Некоторые электрические свойства плотной плазмы (SM-107/129)	1173
Б. А. Алексеев	
The build-up of ionization in a nuclear induced ^3He plasma, at high pressure and moderate temperature, seeded with silver and copper (SM-107/208)	1181
E. Larsson and J. Braun	
Электропроводность сверхплотной плазмы (SM-107/216).....	1195
З. Янкович	

1-k: POWER PLANT CONCEPTS AND ECONOMICS

Conversion des énergies fossiles en électricité par MHD à gaz rares (SM-107/45)	1213
J.P. Azalbert, R. Scaricabarozzi, C. Vavasseur et P. Zettwoog	
Rendement isentropique des tuyères de Faraday à électrodes segmentées pour cycle fermé (SM-107/47)	1231
J.P. Azalbert et A. Fabart	
Thermal parameters of ultra-high-temperature reactors for closed-cycle nuclear MHD power plants (SM-107/79)	1255
P.V. Gilli	
Economic assessment of a nuclear MHD/steam plant with a selection of operating parameters (SM-107/203)	1279
L.G. Sanders	
Programme of Symposium	1303
List of Chairmen and Rapporteurs	1305
Secretariat	1308
Programme Committee	1309
