PART I GENERAL INFORMATION

1. TECHNIQUES FOR IC PROCESSING	2
<i>David B. Fraser and William D. Westwood</i>	
1.1 Introduction	2
1.2 Plasma Processing in Microelectronics	4
1.2.1 Cleaning	7
1.2.2 Deposition	7
1.2.2.1 Sputtering	7
1.2.2.2 Reactive Sputtering	9
1.2.2.3 Step Coverage	9
1.2.2.4 PECVD	10
1.2.2.5 Etching	11
1.3 Summary	12

PART II PLASMA FUNDAMENTALS

2. INTRODUCTION TO PLASMA CONCEPTS AND DISCHARGE CONFIGURATIONS	14
<i>Joseph L. Cecchi</i>	
2.1 Introduction	14
2.1.1 The Plasma State	14
2.1.2 Brief Survey of Plasmas	15
2.1.3 Plasmas for Thin Film Deposition and Etching	16
2.1.4 An Elementary View of Plasma Reactors	17
2.1.4.1 Planar Reactors	18
2.1.4.2 Barrel Reactors	19

2.1.4.3	Downstream Plasma Reactors	20
2.2	Fundamental Plasma Discharge Concepts	20
2.2.1	Debye Shielding	20
2.2.2	Plasma Oscillations	23
2.2.3	Particle Orbits.	24
2.2.3.1	Effects of Electric and Magnetic Fields	24
2.2.3.2	Adiabatic Invariants.	27
2.2.4	Collisional Processes.	30
2.2.4.1	Electron-Neutral Elastic Collisions	31
2.2.4.2	Electron-Electron Collisions	32
2.2.4.3	Electron Impact Inelastic Collisions	33
2.2.4.4	Ion Collision Processes	35
2.2.5	Diffusion and Particle Losses	36
2.2.6	Sheaths	36
2.2.6.1	Non-Conducting or Isolated Surfaces.	36
2.2.6.2	Sheath Near a Conducting Electrode	37
2.3	Electron Heating and Energy Distribution	38
2.3.1	Interaction of Electrons with a Static Electric Field	38
2.3.2	Interaction of Electrons with a Time Dependent Electric Field and Magnetic Field	43
2.3.3	Interaction of Electrons with a Time Dependent Electric Field in the Presence of a Static Magnetic Field	45
2.3.4	The Electron Energy Distribution Function	46
2.4	Breakdown.	47
2.4.1	DC Breakdown	47
2.4.2	RF Breakdown	50
2.5	Glow Discharges	51
2.5.1	DC Glow Discharge	51
2.5.1.1	The Cathode Region	52
2.5.1.2	Secondary Electron Generation	53
2.5.1.3	Ionization in the Cathode Sheath	53
2.5.1.4	Ion Charge Exchange in the Cathode Sheath.	54
2.5.1.5	The Anode Sheath.	54
2.5.1.6	The Negative Glow Region	54
2.5.1.7	Beyond the Negative Glow	55
2.5.1.8	The Positive Column	57
2.5.1.9	Summary of the dc Glow Discharge	58
2.5.2	RF Glow	58
2.5.2.1	Self Bias and Plasma Potential	59
2.5.2.2	Discharge Characteristics.	65
2.5.2.3	RF Discharge Modeling.	65
2.5.2.4	Summary of the rf Glow Discharge	66
2.6	References	66
3.	FUNDAMENTALS OF SPUTTERING AND REFLECTION	70
	<i>David N. Ruzic</i>	
3.1	Introduction.	70
3.1.1	Sputtering Regimes	70

3.2 Modeling	72
3.2.1 TRIM	72
3.2.2 Fractals	73
3.2.3 Fractal TRIM	74
3.2.4 Reflection	76
3.2.5 Molecular Dynamics.	77
3.3 Experimental Yields.	81
3.4 Exceptions.	85
3.5 References	87
4. BOMBARDMENT-INDUCED COMPOSITIONAL CHANGE WITH ALLOYS, OXIDES, OXYSALTS, AND HALIDES	91
<i>Roger Kelly</i>	
4.1 Introduction.	4
4.1.1 The Early Situation	91
4.1.2 Bombardment-Induced (Gibbsian) Segregation, BIS.	93
4.1.3 Bombardment-Induced Mixing.	95
4.1.4 Bombardment-Induced Decomposition	96
4.1.5 Redistribution	97
4.1.6 Surface Binding Energies of Oxides and Halides.	98
4.1.7 General Comments	100
4.2 The Role of the Surface Binding Energy	100
4.2.1 The Surface Binding Energy in Cascade Sputtering.	100
4.2.2 The Bulk Binding Energy, W	102
4.2.3 The Surface Binding Energy for Alloys	103
4.2.4 Application to Compositional Change with Alloys	104
4.2.5 The Surface Binding Energy for Oxides and Halides	107
4.2.5.1 Cation Atom Binding	108
4.2.5.2 Anion Atom Binding	108
4.2.6 Application to Compositional Change with Oxides.	109
4.2.6.1 Metal Atom Yields from Oxides	109
4.2.6.2 Preferential Effects	109
4.3 The Role of Segregation	111
4.3.1 Equilibrium Segregation	111
4.3.2 Bombardment-Induced Segregation, BIS	112
4.3.3 Evaluation of K^b	115
4.3.4 Application to Compositional Change with Alloys	120
4.4 The Role of Bombardment-Induced Decomposition.	121
4.4.1 General Comments	121
4.4.2 Surface Binding Energy	127
4.4.3 Stochastic Rearrangement.	127
4.4.4 Energy-Limited Rearrangement	127
4.4.4.1 Mass Differences	127
4.4.4.2 Bombardment-Induced Amorphization	128
4.4.4.3 Point-Defect Accumulation	128
4.4.4.4 Volatility, Diffusional Transport, BIS	128
4.4.5 Equilibrium Rearrangement.	128
4.5 Overview	130

4.6 References 131

**PART III
NON-REACTIVE PLASMA PROCESSES**

5. RF DIODE SPUTTER ETCHING AND DEPOSITION 140

Joseph S. Logan

5.1 Introduction. 140
 5.1.1 History 140
5.2 RF Discharges. 141
 5.2.1 Breakdown. 141
 5.2.2 RF Self-Bias 141
 5.2.3 Frequency Effect 143
 5.2.4 Electrical Models. 143
5.3 Equipment. 146
 5.3.1 System Designs 146
 5.3.2 Cathode Design. 148
 5.3.3 RF Power Supply 149
 5.3.4 Matching Networks 150
5.4 RF Sputter-Deposition 151
 5.4.1 Direct rf Sputter-Deposition 151
 5.4.2 Film Composition 152
 5.4.3 Substrate Bias Effects. 152
 5.4.4 Material Transport and Uniformity 153
5.5 Sputter Etching Applications. 154
 5.5.1 Comparison to dc Sputter-Etching 154
 5.5.2 Surface Cleaning 154
 5.5.3 Patterning 154
 5.5.4 Uniformity. 155
5.6 Practical Matters 155
 5.6.1 Power Measurements and Power Loss 155
 5.6.2 Current Measurement. 156
 5.6.3 Voltage Measurement. 157
 5.6.4 Rate Measurement. 157
 5.6.5 RF Leakage 157
5.7 References 157

6. MAGNETRON PLASMA DEPOSITION PROCESSES 160

Stephen M. Rossnagel

6.1 Introduction. 160
6.2 Experiments. 163
 6.2.1 Sputtering at the Cathode Surface 163
 6.2.2 Gas Rarefaction Effects 164
 6.2.3 Plasma Measurements. 166
 6.2.4 Interactions: Effects on Plasma 169
 6.2.5 Interactions: Effects on Sputtered Material 171
 6.2.6 Interactions at the Sample Surface 176
6.3 Summary 180

6.4	References	181
7.	BROAD-BEAM ION SOURCES	183
	<i>Harold R. Kaufman and Raymond S. Robinson</i>	
7.1	Introduction	183
7.2	Gridded Ion Sources	184
	7.2.1 General Description	184
	7.2.2 Present Technology	185
7.3	Gridless Ion Sources	187
	7.3.1 General Description	187
	7.3.2 Present Technology	192
7.4	Concluding Remarks	192
7.5	References	192

**PART IV
REACTIVE PLASMA PROCESSES**

8.	REACTIVE ION ETCHING	196
	<i>Gottlieb S. Oehrlein</i>	
8.1	Introduction	196
	8.1.1 Basic RIE Apparatus and Reaction Steps	196
	8.1.2 RIE Processes in Semiconductor Technology	198
8.2	Etch Directionality	200
	8.2.1 General Considerations	200
	8.2.2 Fluorine-vs. Chlorine-vs. Bromine-Based Plasmas	200
	8.2.3 Doping Effect	202
	8.2.4 Etch Directionality Through Sidewall Passivation	203
	8.2.5 Aspect Ratio Dependence of Etch Rate	205
8.3	Plasma Chemical Considerations	206
	8.3.1 Effect of Oxygen Addition	206
	8.3.2 Effect of Hydrogen Addition	209
	8.3.3 Other Gas Additives	209
	8.3.4 Loading Effect	209
8.4	Etch Selectivity	211
	8.4.1 General Considerations	211
	8.4.2 Silicon Dioxide to Silicon Etch Selectivity	212
	8.4.3 Silicon to Silicon Dioxide Etch Selectivity	215
8.5	Contamination and Damage Issues	215
	8.5.1 Survey of RIE Damage Effects	215
	8.5.2 Silicon Surface Modifications Due to Selective SiO ₂ , Si RIE	217
	8.5.3 Etch Rate Dependence of Lattice Damage	219
	8.5.4 Post-RIE Surface Recovery Treatments	220
8.6	Reactor, Equipment Considerations	221
	8.6.1 Reactor Types	221
	8.6.2 Reactor Materials	221
	8.6.3 Chamber Cleanliness, Process Reproducibility Issues	222
	8.6.4 Single Wafer vs. Batch Reactors	223

8.7	End Point Detection and Plasma Diagnostics	225
8.7.1	General Considerations	225
8.7.2	Laser Interferometry, Reflectance	225
8.7.3	Optical Emission Spectroscopy	225
8.8	Current Trends	226
8.9	References	228
9.	REACTIVE SPUTTER DEPOSITION	233
	<i>William D. Westwood</i>	
9.1	Introduction	233
9.2	Plasma-Based Sputtering Techniques: Hysteresis Effects	233
9.3	Reaction Kinetics: Models	237
9.4	Sputtered Species	237
9.4.1	Cluster Emission	237
9.4.2	Negative Ion Emission	238
9.5	Plasma-Based Sputtering Systems	240
9.5.1	Diode Systems	240
9.5.2	Magnetron Systems	243
9.5.3	Modified Magnetron Systems	249
9.5.4	Monitoring Systems	252
9.6	Reactive Sputter Deposition with Ion Beams	255
9.7	Conclusions	256
9.8	References	257
