

# CONTENTS

---

<i>Preface</i> . . . . .	v
<i>Chapter 1.</i> INTRODUCTION . . . . .	1
1.1. Atomic collisions in solids . . . . .	1
1.2. Atomic structure . . . . .	2
1.3. Scattering of charged particles . . . . .	5
<i>Chapter 2.</i> CHANNELLING AND BLOCKING . . . . .	9
2.1. Introduction . . . . .	9
2.2. Continuum potential and critical angle . . . . .	10
2.3. Rutherford shadow (blocking) . . . . .	15
2.4. Modification of the Lindhard theory . . . . .	18
<i>Chapter 3.</i> QUANTUM EFFECTS IN ELECTRON AND POSITRON CHANNELLING . . . . .	23
3.1. Introduction . . . . .	23
3.2. One-dimensional periodic field . . . . .	23
3.3. Quantum corrections to the Lindhard theory . . . . .	24
3.4. Electron channelling . . . . .	26
3.5. Electron diffraction and the scattering factor . . . . .	30
3.6. Multiple scattering model . . . . .	33
3.7. Bethe's dynamical theory of electron diffraction . . . . .	36
3.8. Correction to the two-wave theory . . . . .	44
<i>Chapter 4.</i> INELASTIC SCATTERING OF ELECTRONS AND IONS IN CRYSTALS . . . . .	54
4.1. Introduction . . . . .	54
4.2. Anomalous absorption . . . . .	54
4.3. Calculation of absorption coefficients . . . . .	58
4.4. Complex potential (Yoshioka term) . . . . .	67
4.5. Comparison with experiments . . . . .	70
4.6. Diffuse patterns . . . . .	71
4.7. Kikuchi patterns . . . . .	75
4.8. Stopping power, stopping power function and inelastic scattering function . . . . .	83
4.9. Energy loss due to photon emission . . . . .	108

<i>Chapter 5.</i>	DECHANELLING . . . . .	125
5.1.	Phenomenological theory . . . . .	125
5.2.	Calculation of diffusion coefficients by the inelastic scattering function . . . . .	129
5.3.	Planar dechannelling . . . . .	142
5.4.	Axial dechannelling . . . . .	148
5.5.	Diffusion of electron beams . . . . .	149
5.6.	Applications of dechannelling . . . . .	151
<i>Chapter 6.</i>	CHARGE STATES, SCREENING AND WAKE . . . . .	155
6.1.	Introduction . . . . .	155
6.2.	Equilibrium charge states and effective charge . . . . .	155
6.3.	Charged states of channelled ions and the Okorokov effect . . . . .	167
6.4.	Screening and wake . . . . .	174
<i>Chapter 7.</i>	PARTICLES AND SOLID SURFACES . . . . .	186
7.1.	Introduction . . . . .	186
7.2.	LEED . . . . .	187
7.3.	Backscattering, surface scattering and structure analysis . . . . .	200
7.4.	Neutralization of ions at surfaces . . . . .	206
7.5.	Dynamical surface potential . . . . .	221
7.6.	Skipping motion, surface energy loss and photon emission . . . . .	233
7.7.	Interaction between two ions near the surface . . . . .	239
<i>Index . . . . .</i>		247
