

Contents

Preface		vii
1	Introduction <i>C. A. McDowell</i>	1
2	Types of mass spectrometers <i>J. B. Farmer</i>	7
3	Mass spectrometry in research <i>W. A. Bryce</i>	45
4	Ion sources <i>R. M. Elliott</i>	69
5	Ion optics <i>L. Kerwin</i>	104
6	Electronic techniques <i>D. C. Frost</i>	179
7	High-resolution mass spectrometers <i>H. E. Duckworth and S. N. Ghoshal</i>	201
8	Vacuum techniques <i>H. A. Tasman, A. J. H. Boerboom, and J. Kistemaker</i>	275
9	Chemical analysis by mass spectrometry <i>V. H. Dibeler</i>	334

x CONTENTS

10	Isotope abundance measurements and their application to chemistry C. C. McMullen and H. G. Thode	375
11	Mass spectrometry of free radicals F. P. Lossing	442
12	The ionization and dissociation of molecules C. A. McDowell	506
13	Ion-molecule reactions D. P. Stevenson	589
	Name Index	617
	Subject Index	625
