Contents

Chapter 1 **Ionization Processes and Ion Dynamics**
By C. Lifshitz

1 Introduction 1

2 Ionization Processes 1
Molecular Processes 1
Multi-photon Ionization 7
Mass Spectrometric Studies 9
Electron Collision and Other Ionization Phenomena 10
Negative ions 12
Doubly and Multiply Charged Ions 14

3 Spectroscopy and Structure of Ions 18

4 Intramolecular Relaxation and Decay Processes 23
Unimolecular Dissociation Dynamics, Transition-state and Related Dissociation Treatements 27

5 Bimolecular Reactions 35

References 46

Chapter 2 **Structures and Reactions of Gas-phase Organic Ions**
By M. A. Baldwin

1 Introduction 59

2 Quantum Mechanical Calculations 60

3 Theories of Mass Spectrometric Reactions 68

4 Ion Thermochemistry 69

5 Tandem Studies 72
Metastable Ions and Kinetic-energy Release 74
Collisional-energy Transfer 77
Structural Studies by CID 80
Charge Permutation Reactions 83
Ionization of Fast Neutral Beams 85
Ion/Molecule Reactions 88

6 Stereospecific and Stereoelectronic Reactions 90

References 92

Chapter 3 The Chemistry of Gas-phase Ion Clusters
By A. J. Stace

1 Introduction 96

2 Formation of Ion Clusters 97
Adiabatic Expansion 97
High-pressure Mass Spectrometry 98
Sputtering 99

3 The Ionization of Neutral Clusters 100

4 Magic Numbers 102

5 Multiply Charged Ion Clusters 106

6 Ion Cluster Reactions 108
Metastable Decay 108
Ion/Molecule Reactions in Clusters 109
The Unimolecular Decomposition of Molecular Ions in Association with Inert-gas Clusters 114

7 Negative-ion Clusters 117

References 118

Chapter 4 Developments and Trends in Instrumentation
By T. R. Kemp

1 Introduction 122

2 Ionization Methods and Analysers 122

3 Sample Introduction 130

4 Reaction Studies 132

5 Detection Systems 137

6 Other Techniques 140

Chapter 5 Applications of Computers and Microprocessors in Mass Spectrometry
By J. R. Chapman

1 Introduction 143

2 Instrumentation (Instrument Control and Data Acquisition) 143
Mass Spectrometry-Mass Spectrometry Techniques 143
Secondary-ion Mass Spectrometry Techniques 146
Isotopic Measurements 147
Fourier-transform Techniques 150
On-line Mass Spectrometry (Process Control) 151
Gas Chromatography/Mass Spectrometry 153
Miscellaneous Techniques 153

3 Data Processing 154
Gas Chromatography/Mass Spectrometry 154
Library Search 158
Group Classification 162
Miscellaneous Methods in Organic Mass Spectrometry 163
Pyrolysis-Mass Spectrometry 164
Inorganic Analysis 165

4 Other Software 166
Isotopic Abundance Calculations 166
Instrument Design 166
Miscellaneous 167

References 167

Chapter 6 Reactions of Organic Negative Ions in the Gas Phase
By J. H. Bowie

1 Introduction 172

2 Negative Ions Formed by Electron Capture (or Dissociative Electron Capture): Fragmentation Mechanisms 172

3 Negative-ion Chemical Ionization Mass Spectrometry 173

4 Negative-ion Fast-atom Bombardment Mass Spectrometry 177

5 Other Ionization Techniques 180

6 Ion/Molecule Reactions and Related Topics 180

References 187

Chapter 7 Analysis of Mixtures by Mass Spectrometry Part I: Developments and New Applications of Gas Chromatography/Mass Spectrometry
By R. P. Evershed

1 General Considerations 196
Introduction 196
Instrumentation 197
Interfaces 199
The Role of Data Systems 200
Quantification 201
Sampling 202
Chromatographic Aspects 204
Derivatization 206
Stereo- and Positional Isomeric Assignments 211

2 Applications 216
Long-chain Compounds 216
Prostaglandins and Related Eicosanoids 219
Isoprenoid Compounds 222

Steroids 223
Carbohydrates 223
Pyrimidines, Purines, Nucleosides, and Nucleotides 225
Amines 227
Amino Acids and Peptides 229
Clinical and Metabolic Studies 232
Food and Agricultural Chemistry 233
Environmental Science and Toxicology 235
Papers of General Interest 236
Air and Airborne Particulate Pollution 236
Water Pollution, Effluents, and Fuel Spills 238
Pesticides and Halogenated Residues 239
Toxicology and Forensic Science 243
Organic Geochemistry and Fuel 244
Pyrolysis-GC/MS 248

References 249

Chapter 8 Analysis of Mixtures by Mass Spectrometry Part II: Liquid Chromatography/Mass Spectrometry and Supercritical Fluid Chromatography/Mass Spectrometry
By M. E. Rose

1 Introduction 264

2 High-performance Liquid Chromatography/Mass Spectrometry 265
Direct Introduction Methods 265
Applications of Direct Introduction Methods 268
Mechanical Transport Systems 270
Applications of the Moving-belt Int(ace 272

3 Supercritical Fluid Chromatography/Mass Spectrometry 273
Instrumentation 274
Applications 277

4 Conclusion 279

References 280

Chapter 9 Mass Spectrometry Applied to Natural Products: Steroids
By I. Howe

1 Introduction 285

2 Structures and Mechanisms: Fundamental Studies 285

3 GC/MS Analysis of Steroids 288

4 Polar Steroidal Derivatives 293

5 Quantitative Measurements 298

6 Vitamin D_3 300

References 301

Chapter 10 Drug Metabolism, Pharmacokinetics, and Toxicity
By D. J. Harvey

1 Introduction 303
General 303
Books, Reviews, and Conference Reports 303

2 Current Trends 304
New Ionization Methods 304
LC/MS Interfacing 305
MS/MS Techniques 305

3 Quantitative Studies 306

4 Stable Isotopes 313

5 Contamination and Decomposition of Samples 314

6 Metabolic Studies with Model Compounds 314

7 Anticancer Drugs 315

8 Antimicrobial Agents 319

9 Drugs of Abuse 322
Cannabinoids 322
Opiates 323
Cocaine 325
Nicotine 325
Alcohol 325
Amphetamines 326
Phencyclidines 326
1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine 328

10 Analgesics 328
Paracetamol and Related Analgesics 328
Other Analgesics 329

11 Cardiovascular Drugs 332
Antiarrhythmics 332
Beta-blockers 332
Dihydropyridine Calcium Antagonists 334
Captopril and Related Compounds 335
Miscellaneous Cardiovascular Drugs 336

12 Centrally Active Drugs 337
Tricyclic Antidepressants 337
Phenothiazines 338
Benzodiazepines 339
Barbiturates 340
Hydantoins 341
Valproic Acid 341
Catecholamines and Related Stimulants 342
Other Centrally Active Drugs 343

13	Drugs Affecting Pulmonary Function	345
14	Antihistamines	346
15	Steroids	347
16	Diethylstilbestrol	348
17	Non-steroid Anti-inflammatory Agents	349
18	Prostaglandin Derivatives	350
19	Anticoagulants	351
20	Metabolic Studies on Other Miscellaneous Drugs	351
21	Miscellaneous Clinical Studies Using GC/MS	353
	References	354

Chapter 11 **Metal-containing and Inorganic Compounds Investigated by Mass Spectrometry**
By J. Charalambous

1	Introduction	373
2	Main-group Organometallic Compounds	373
3	Transition-metal Organometallic Compounds	378
	Carbonyl and Related Complexes	378
	Complexes Containing Hydrocarbon Ligands	379
	Transition-metal Cluster Compounds	384
4	Chelate, Macrocyclic, and Other Complexes	385
	Neutral Chelates	385
	Cationic Complexes	387
	Macrocycles	389
	Carboxylate and Related Complexes	390
	Metal Halide Adducts and Miscellaneous Complexes	391
5	Miscellaneous Inorganic Compounds	391
6	Reactions of Gaseous Metal or Metal-containing Ions with Organic Compounds or Other Molecules	392
7	Knudsen-cell Mass Spectrometry	396
	References	397

Chapter 12 **The Current State of Quantitative Metal Analysis by Mass Spectrometry**
By D. E. Pratt, J. Eagles, and R. Self

1	Introduction	407
2	Spark-source Mass Spectrometry	410

3	Inductively Coupled Plasma/Mass Spectrometry	412
4	Thermal-ionization Mass Spectrometry	414
5	Resonance-ionization Mass Spectrometry	417
6	Laser Microprobe Mass Analysis	418
7	Secondary-ion Mass Spectrometry	420
	Ionization of Secondary Neutrals	421
	Ion Microprobe Mass Analysis	421
8	Fast-atom Bombardment Mass Spectrometry	422
9	Other Techniques	423
10	Conclusion	424
	References	424
