CONTRIBUTORS TO VOLUME VI	v
PREFACE	vii

The Theory of Unsteady Laminar Boundary Layers

By K. STEWARTSON, *The Durham Colleges in the University of Durham, Durham, England*

I. Introduction	1
II. Rayleigh Problems for an Incompressible Fluid	3
III. Rayleigh's Problem for a Compressible Fluid	6
IV. Boundary Layer Growth in an Incompressible Fluid	16
V. Fluctuating Boundary Layers	25
VI. Unsteady Compressible Boundary Layers	29
Notation	34
References	35

Boundary-Layer Theory with Dissociation and Ionization

By G. LUDWIG AND M. HEIL, *Institut für Theoretische Physik der Freien Universität Berlin, Berlin, Germany*

Introduction	39
I. The Collision Equations	42
II. The Equations of Transport for Molecular Properties of the Particles A_μ	48
III. The Solution of the Collision Equations	54
IV. The Collision Cross Section for the Dissociation of a Diatomic Molecule by Collision with an Atom	87
V. The Boundary-Layer Equations for a Dissociating Gas A_2	93
VI. The Solution of the Laminar Boundary-Layer Equations for a Dissociating Gas	101
Notation	113
References	116

The Propagation of Shock Waves along Ducts of Varying Cross Section

By W. CHESTER, *University of Bristol, Bristol, England*

I. General Introduction	120
II. The Steady State Theory	123
III. Chisnell's Theory	133
IV. Comparison of the Two Theories	143
V. Steady Flow Regime Ahead of the Shock	144
References	152

Similarity and Equivalence in Compressible FlowBY KLAUS OSWATITSCH, *Deutsche Versuchsanstalt für Luftfahrt, Aachen, Germany*

I. Basic Considerations	154
II. Applications of the Linear Theory	178
III. Higher Approximations	198
IV. Transonic Similarity	215
V. Hypersonic Similarity	236
VI. Unsteady Flows	242
VII. Bodies of Low Aspect Ratio	248
References	269

Kármán Vortex StreetsBY R. WILLE, *Technische Universität Berlin, Berlin, Germany*

1. Introduction	273
2. Stability Theory	275
3. Other Theories on Vortex Streets	277
4. Experimental Investigations of Vortex Streets	279
5. Related Problems	283
6. Summary	285
References	286
AUTHOR INDEX	289
SUBJECT INDEX	293
