## Hypersonic Flow over Slender Bodies Associated with Power-Law Shocks

BY HAROLD MIRELS, *Lewis Research Center, National Aeronautics and Space Administration, Cleveland, Ohio*

I. Introduction . . . . .	2
II. Hypersonic Slender-Body Theory . . . . .	4
III. Flows Associated with Power-Law Shocks . . . . .	8
IV. Flows Associated with Slightly Perturbed Power-Law Shocks . . . . .	26
V. Integral Methods . . . . .	36
VI. Validity of Self-Similar Solutions . . . . .	43
VII. Further Discussion of Integral Methods . . . . .	47
VIII. Concluding Remarks . . . . .	49
Notation . . . . .	51
References . . . . .	52
Addendum . . . . .	317

## The Mathematical Theory of Equilibrium Cracks in Brittle Fracture

BY G. I. BARENBLATT, *Institute of Geology and Development of Combustible Minerals of the U.S.S.R. Academy of Sciences, Moscow, U.S.S.R.*

I. Introduction . . . . .	56
II. The Development of the Equilibrium Crack Theory . . . . .	62
III. The Structure of the Edge of an Equilibrium Crack in a Brittle Body . . . . .	69
IV. Basic Hypotheses and General Statement of the Problem of Equilibrium Cracks . . . . .	76
V. Special Problems in the Theory of Equilibrium Cracks . . . . .	90
VI. Wedging; Dynamic Problems in the Theory of Cracks . . . . .	114
References . . . . .	125

## Plasticity Under Non-Homogeneous Conditions

BY W. OLSZAK, J. RYCHLEWSKI AND W. URBANOWSKI, *Institute of Fundamental Technical Problems, Polish Academy of Sciences, Warsaw*

I. Physical Foundations . . . . .	132
II. Plane Strain . . . . .	151
III. Particular Solutions . . . . .	183
IV. Elastic-plastic Non-homogeneous Plates . . . . .	190

V. Limit Analysis and Limit Design . . . . . 191  
 VI. Propagation of Elastic-plastic Waves in a Non-homogeneous Medium . . 201  
 VII. Other Problems . . . . . 203  
 References . . . . . 206

**Some Elementary Problems in Magneto-hydrodynamics**

BY RAYMOND HIDE AND PAUL H. ROBERTS, *Physics Department, King's College  
(University of Durham), Newcastle-upon-Tyne, 1, England*

I. Introduction . . . . . 216  
 II. Basic Equations of Magneto-hydrodynamics . . . . . 219  
 III. Electromagnetic and Mechanical Effects; Dimensionless Parameters . . . 224  
 IV. Boundary Conditions . . . . . 233  
 V. Plane Waves . . . . . 244  
 VI. Alfvén Waves in Systems of Finite Extent . . . . . 261  
 VII. Gravity Waves: Rayleigh-Taylor Instability . . . . . 267  
 VIII. Gravitational Instability: Jeans' Criterion . . . . . 270  
 IX. Steady Flow between Parallel Planes . . . . . 274  
 X. Flow due to an Oscillating Plane: Rayleigh's Problem . . . . . 286  
 XI. Steady Two-dimensional Inertial Flow in the Presence of a Magnetic Field . 300  
 Appendix A: The Hydromagnetic Energy Equation . . . . . 305  
 Appendix B: Relativistic Magneto-Hydrodynamics . . . . . 311  
 Acknowledgements . . . . . 313  
 References . . . . . 313  
 AUTHOR INDEX . . . . . 321  
 SUBJECT INDEX . . . . . 327
