CONTRIBUTORS TO VOLUME VIII	v
Theodore von Kármán: A Tribute	vii

Magneto-Aerodynamic Flow Past Bodies

BY W. R. SEARS AND E. L. RESLER, JR., *Cornell University, Ithaca, New York*

Notation	1
Introduction	4
I. Incompressible Flow	6
II. Compressible Flow	23
III. Hall Effects	50
References	64

Incompressible Second-Order Fluids

BY HERSEL MARKOVITZ AND BERNARD D. COLEMAN, *Mellon Institute, Pittsburgh, Pennsylvania*

I. Introduction	69
II. Relation to General Simple Fluids	71
III. Steady Simple Shearing Flow	77
IV. Viscometric Flows	79
V. Steady Extension of a Cylinder	87
VI. Relation to Classical Viscoelasticity	89
VII. Nonsteady Shearing Flows	96
Acknowledgments	100
References	100

The Generation of Sound by Turbulent Jets

BY H. S. RIBNER, *Institute of Aerophysics, University of Toronto, Canada*

Notation	104
I. Introduction	105
II. Résumé of Major Features	106
A. Simplified Physical Account	109
III. Physics of Sound Generation	109
IV. Equivalent Aerodynamic Generators of Sound	115
V. Sound Radiated from a Jet	119
B. Mathematical Development	142
VI. Governing Equations	142

VII. Convection Effects for a Simplified Model of Turbulence	151
VIII. Refraction Effects Due to the Mean Flow	159
IX. Improved Model: Isotropic Turbulence Superposed on Mean Flow . . .	163
X. Sound Emission from a Complete Jet	169
XI. Asymptotic Behavior at High Mach Number	175
Acknowledgment	178
References	178

Stability of Motion of Solid Bodies with Liquid-Filled Cavities by Lyapunov's Methods

BY V. V. RUMYANTSEV, *Institute of Mechanics of the U.S.S.R.
Academy of Sciences, Moscow, U.S.S.R.*

Notation	183
Introduction	184
I. Simplest Cases of Motion; the Cavity is Completely Filled	186
II. Stability of Motion of a Solid-Liquid Body with Respect to a Part of the Variables	203
III. Stability of Steady Motion of a Solid Body with Liquid-Filled Cavity .	214
References	230

Introduction to the Theory of Oscillations of Liquid-containing Bodies

BY N. N. MOISEEV, *Computing Centre of the U.S.S.R. Academy of Sciences,
Moscow, U.S.S.R.*

Introduction	233
I. Survey of Special Problems	235
II. General Properties of the Equations	268
References	287
Selected Bibliography	288
AUTHOR INDEX	291
SUBJECT INDEX	295
