### Hydrodynamic Stability of Parallel Flow of Inviscid Fluid

BY P. G. DRAZIN AND L. N. HOWARD, *Department of Mathematics, University of Bristol, England, and Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts*

I. Introduction . . . . .	1
II. Inertial Instability . . . . .	3
III. Waves and Stability of Plane Parallel Flow of Inviscid Fluid under the Actions of Various Force Fields . . . . .	43
IV. Heuristic Theory of Instability . . . . .	54
V. Instability of an Incompressible Fluid of Variable Density . . . . .	60
VI. Stability of Other Parallel Flows . . . . .	79
References . . . . .	85

### The Calculation of Free Oscillations of a Liquid in a Motionless Container

BY N. N. MOISEEV AND A. A. PETROV, *Computing Center of the U.S.S.R. Academy of Sciences, Moscow, U.S.S.R.*

I. Introduction . . . . .	91
II. Application of the Ritz Method to the Calculation of Natural Oscillations of a Liquid in Containers of Various Shapes . . . . .	106
Appendix: The Escalator Method for Solving the Equation $P\mathbf{x} = \lambda Q\mathbf{x}$ . . . . .	148
Conclusion . . . . .	153
References . . . . .	153

### On Nonlinear Vibrations of Systems with Many Degrees of Freedom

BY R. M. ROSENBERG, *Department of Mechanical Engineering, Division of Applied Mechanics, University of California, Berkeley, California*

I. Introduction . . . . .	156
II. Admissible Systems and Motions . . . . .	158
III. The Trajectories in Configuration Space . . . . .	163
IV. General Description of the Geometrical Method . . . . .	167
V. Trajectories of Admissible Motion . . . . .	169
VI. Normal-Mode Vibrations of Nonlinear Systems . . . . .	173

VII. Properties of Motions with a Rest Point . . . . .	176
VIII. Special Autonomous Systems . . . . .	187
IX. The ateb-Functions . . . . .	191
X. Nonsimilar Normal-Mode Vibrations . . . . .	199
XI. Exact Solutions to Steady-State Forced Vibrations . . . . .	203
XII. Steady-State Forced Vibrations by Approximate Methods . . . . .	214
XIII. Stability . . . . .	218
Appendix: On the Existence of Simple Trajectories in Admissible $n$ -Degree-	
of-Freedom Systems . . . . .	233
References . . . . .	240

#### Fundamental Problems in Viscoplasticity

BY PIOTR PERZYNA, *Institute of Basic Technical Research, Polish Academy of Sciences,  
Warsaw, Poland*

I. Physical Foundations . . . . .	244
II. Constitutive Equations . . . . .	260
III. Stress Wave Propagation in an Elastic/Viscoplastic Medium . . . . .	302
IV. Quasi-Static Solutions . . . . .	350
V. Other Dynamical Problems . . . . .	361
References . . . . .	368
 AUTHOR INDEX . . . . .	 379
SUBJECT INDEX . . . . .	384
