PREFACE	ix

Finite Element Methods in Continuum Mechanics

Theodore H. H. Pian and Pin Tong

I. Introduction	2
II. Finite Element Formulation of Linear Elasticity Problems	5
III. Finite Element Formulation of Several Continuum Mechanics Problems	34
Appendix. Interpolation Functions	47
References	53

The Motion of Bubbles and Drops Through Liquids

J. F. Harper

I. Introduction	59
II. A Bubble with Constant Surface Tension Rising Under Gravity	61
III. A Drop with Constant Surface Tension Moving Under Gravity	89
IV. Surface Activity	101
References	124

Shock Waves, Jump Relations, and Structure

P. Germain

Introduction	132
I. Shock Solution for a Mathematical Model Related to a Single Conservation Law	133
II. Shock Conditions. Examples from Gas Dynamics and Magneto-Fluid Dynamics	145

III. Classical Shock Structure	156
IV. General Theory of Shock Conditions and Shock Structure in Classical Gas Dynamics	175
References	193
Interplanetary Gas Dynamics	
<i>V. C. Liu</i>	
I. Introduction	195
II. Methods of Gas Kinetics and Continuum Flows	203
III. Collective Particle Behavior of the Interplanetary Gas	212
IV. Hydrodynamic Coronal Expansion	221
V. A Wave-Pump Problem	224
VI. Free Expansion Phenomenon	227
VII. A Generalized Free Expansion Problem	230
VIII. Concluding Remarks	234
References	235
AUTHOR INDEX	239
SUBJECT INDEX	245
