## **Theory of Buckling and Post-Buckling Behavior of Elastic Structures**

*Bernard Budiansky*

I. Introduction	2
II. Simple Models	2
III. Functional Notation, Variational Calculus, and Frechet Derivatives	11
IV. Energy Approach	16
V. Stress, Strain, Displacement; Virtual-Work Approach	41
VI. Mode Interaction	58
References	63

## **Plastic Buckling**

*John W. Hutchinson*

I. Introduction	67
II. Simple Models	70
III. Bifurcation Criterion	86
IV. Initial Post-Bifurcation Behavior for Donnell–Mushtari–Vlasov Theory	105
V. Numerical Examples	132
References	141

## **Multistructured Boundary Layers on Flat Plates and Related Bodies**

*K. Stewartson*

I. Introduction	146
II. The Basic Flow	156
III. The Triple Deck	158

IV. The Fundamental Equation of the Triple Deck	167
V. Transonic Free Interaction	169
VI. Free Interactions in Supersonic Flow	171
VII. Expansive Free Interactions	174
VIII. Compressive Free Interactions	176
IX. The Plateau	184
X. Comparison with Experiment	188
XI. Convex Corners in Supersonic Flow	194
XII. Injection into the Supersonic Boundary Layer	200
XIII. The Trailing Edge of a Symmetrically Disposed Flat Plate	213
XIV. Trailing-Edge Flows for Bodies with Finite Thickness	222
XV. Viscous Correction to Lift	225
XVI. Catastrophic Separation	229
XVII. Addendum	231
References	234

## Response Curves for Plane Poiseuille Flow

*Daniel D. Joseph*

I. Introduction	241
II. The Solution of the Basic Equations for Laminar Poiseuille Flow	245
III. Global Stability of Laminar Poiseuille Flow	246
IV. The Fluctuation Motion and the Mean Motion	249
V. Steady Causes and Stationary Effects	250
VI. Laminar and Turbulent Comparison Theorems	251
VII. Turbulent Plane Poiseuille Flow—An Upper Bound for the Response Curve	253
VIII. The Response Function near the Point of Bifurcation	256
IX. Some Properties of the Bifurcating Solution	261
X. Inferences and Conjectures	263
Appendix: A Formal Bifurcation Theory for Nearly Parallel Flows	268
References	276

## The Theory of Polar Fluids

*S. C. Cowin*

I. Introduction	279
II. Foundations of the Theory	290
III. Related Theories	335
References	344
Note Added in Proof	347
AUTHOR INDEX	349
SUBJECT INDEX	354
