vii

## Some Aspects of Turbulence in Geophysical Systems

*Robert R. Long*

I. Introduction	2
II. Introductory Concepts in Turbulence—Homogeneous Fluids	7
III. Some Basic Effects of Density Variations and Rotation	21
IV. Thermal Convection	33
V. Turbulence in Stably Stratified Fluids	50
VI. Third-Order Closure Schemes in Turbulence Research	72
References	84

## Singular-Perturbation Problems in Ship Hydrodynamics

*T. Francis Ogilvie*

I. Introduction	92
II. Slender-Body Theory in Aerodynamics	95
III. Slender Ships in Unsteady Motion at Zero Speed	105
IV. Slender Ships in Steady Forward Motion	145
V. Slender Ships in Unsteady Forward Motion	169
References	185

## Special Topics in Elastostatics

*J. L. Ericksen*

I. Introduction	189
II. Basic Equations	192
III. Semi-Inverse Methods	200
IV. Experiment and Mechanistic Theory	220
References	241

**On Nonlinear Parametric Excitation Problems***C. S. Hsu*

I. Introduction	245
II. Asymptotic Analysis for Weakly Nonlinear Systems	247
III. Analysis by Difference Equations	257
IV. Second Order Difference Systems	266
V. Global Regions of Asymptotic Stability	276
VI. Impulsive Parametric Excitation	283
VII. An Example: A Hinged Bar Subjected to a Periodic Impact Load	286
References	298

**Foundations of the Theory of Surface Waves  
in Anisotropic Elastic Materials***P. Chadwick and G. D. Smith*

I. Introduction	304
II. Algebraic Preliminaries	306
III. Elasticity Tensors	310
IV. The Fundamental Eigenvalue Problem	314
V. Plane Elastostatics	325
VI. A Uniformly Moving Line Singularity	332
VII. Elastic Surface Waves. Basic Analysis	347
VIII. The Uniqueness and Related Properties of Free Surface Waves	355
IX. The Existence of Free Surface Waves	359
X. Supplementary Topics	373
References	374
AUTHOR INDEX	377
SUBJECT INDEX	383
