Stress Analysis for Fiber-Reinforced Materials

Allen C. Pipkin

I. Introduction	2
II. Small, Plane Deformations of Ideal Composites	4
III. Plane Problems in Transversely Isotropic Elasticity	16
IV. Asymptotic Approximations to Elasticity Theory	26
V. Finite Deformations	35
References	48

Theory of Water-Wave Refraction

R. E. Meyer

I. Introduction	53
II. Linear Surface Waves	57
III. Refraction Equations	60
IV. Simple Ray Theory	69
V. Uniform Ray Theory	87
VI. Shore Condition	97
VII. Resonant Wave Trapping: Frequency	100
VIII. Resonant Wave Trapping: Response	112
IX. Underwater Reflection	126
X. Developing Wave Patterns	133
References	138

Polymer Fluid Mechanics

J. D. Goddard

I. General Survey and Review of Rheological Models	143
II. Kinematics and Stress for Commutative Motions of Simple Fluids	163

III. Kinematics and Dynamics for General Flows	179
Appendix: Analysis of the Linear, Neutral Taylor–Couette Stability in Simple Fluids	193
References	213
Relaminarization of Fluid Flows	
<i>R. Narasimha and K. R. Sreenivasan</i>	
I. Introduction	222
II. The Governing Equations	226
III. Reversion by Dissipation	228
IV. Reversion in Stably Stratified Flows	240
V. Reversion in Highly Accelerated Flows	246
VI. Curved Flows	267
VII. Relaminarization by Rotation	275
VIII. Thermal Effects	279
IX. Surface Mass Transfer	283
X. Magnetohydrodynamic Duct Flows	288
XI. Other Instances of Relaminarization	297
XII. Conclusion	299
References	303
