## Aspects of Suspension Shear Flows

*S. L. Lee*

I. Introduction	2
II. Theories on Laminar Shear Flows of a Dilute Suspension Considering Only Stokes Drag and Neglecting Particulate Volume	3
III. Theories on Laminar Shear Flows of a Dilute Suspension Considering Both Drag and Lift Forces and Neglecting Particulate Volume	10
IV. Theories on Laminar Shear Flows of a Dilute Suspension Considering Both Drag and Lift Forces, Density Effects, and Finiteness of Particulate Volume	22
V. Experiments on Laminar Shear Flows of a Dilute Suspension by the Use of Laser-Doppler Anemometry Technique	30
VI. Laser-Doppler Anemometry Applied to Turbulent Shear Flows of a Dilute Suspension with a Distribution of Particle Sizes	40
VII. Theories on Particle Deposition in Turbulent Channel Flow of a Dilute Suspension	56
VIII. Concluding Remarks	61
References	63

## Nonlinear Dynamics of Deep-Water Gravity Waves

*Henry C. Yuen and Bruce M. Lake*

I. Introduction	68
II. Governing Equations	69
III. Concept of a Wave Train	71
IV. Properties of Weakly Nonlinear Wave Trains in Two Dimensions	73
V. Properties of a Weakly Nonlinear Wave Train in Three Dimensions	96
VI. Large-Amplitude Effects	111
VII. Nonlinear Wave Fields	153
VIII. Discussion	214
Appendix A. Interaction Coefficients	223
Appendix B. Lorentzian and Bretschneider Spectra	224
References	225

**Instability and Transition in Buoyancy-Induced Flows***B. Gebhart and R. L. Mahajan*

I. Introduction	232
II. Initial Instability in Thermally Buoyant Flows	234
III. The Downstream Growth of Disturbances in a Vertical Flow	237
IV. Nonlinear Disturbance Growth	247
V. Transition and Progression to Developed Turbulence	259
VI. Predictive Parameters for the Events of Transition	274
VII. Plane Plume Instability and Transition	283
VIII. Instability of Combined Buoyancy-Mode Flows	295
IX. Higher Order Effects in Linear Stability Analysis	305
List of Symbols	311
References	312
AUTHOR INDEX	317
SUBJECT INDEX	321
