LIST OF CONTRIBUTORS vii

PREFACE ix

## Micromechanics of Crystals and Polycrystals

*Robert J. Asaro*

I. Introduction	2
II. Micromechanics of Crystallographic Slip	4
III. Constitutive Laws for Elastic-Plastic Crystals	36
IV. Applications to Elastic-Plastic Deformation of Single Crystals	67
V. Some Outstanding Problems	81
References	111

## Mechanisms of Deformation and Fracture

*M. F. Ashby*

I. Introduction	118
II. Mechanisms of General Plasticity and Creep	121
III. Deformation Mechanism Maps	130
IV. Mechanisms of Fracture by General Damage	147
V. Fracture Mechanism Maps	155
VI. Conclusions	171
References	172

## Recent Developments Concerning Saint-Venant's Principle

*Cornelius O. Horgan and James K. Knowles*

I. Introduction	180
II. A Model Problem	182
III. Linear Elastostatic Problems	213
IV. Principles of Saint-Venant Type in Other Contexts	250
V. Concluding Comments	261
References	262

## Nonlinear Elastic Shell Theory

*A. Libai and J. G. Simmonds*

I. Introduction	272
II. Cylindrical Motion of Infinite Cylindrical Shells (Beamshells)	274
III. The Equations of General Nonlinear Shell Theory	302
IV. Nonlinear Plate Theory	332
V. Static One-Dimensional Strain Fields	337
VI. Approximate Shell Theories	344
Appendix. The Equations of Three-Dimensional Continuum Mechanics	365
References	365

## Elastic Surface Waves with Transverse Horizontal Polarization

*Gérard A. Maugin*

I. Introduction	373
II. Some General Features of Surface Waves	380
III. The Notion of Resonance Coupling between Modes	385
IV. A Typical SH Surface Mode: Bleustein–Gulyaev Wave	391
V. SH Surface Waves in Nonhomogeneous Elastic Media	395
VI. Electroacoustic SH Surface Waves in Ferroelectrics	407
VII. Magnetoacoustic SH Surface Waves in Magnetoelasticity	421
References	431
