PREFACE xi

New Directions in Solitons and Nonlinear Periodic Waves

John P. Boyd

| | |
|--|----|
| I. Introduction | 2 |
| II. Polycnoidal Waves | 4 |
| III. Periodic ("Cnoidal") Waves as Exact Imbricate Series of Solitons | 17 |
| IV. Numerical Boundary Value Algorithms for Direct Computation of Solitons | 24 |
| V. Weakly Nonlocal Solitary Waves | 49 |
| VI. Summary: <i>Quo Vadis?</i> | 74 |
| Acknowledgments | 76 |
| References | 76 |

Material Failure by Void Growth to Coalescence

Viggo Tvergaard

| | |
|--|-----|
| I. Introduction | 83 |
| II. Basic Equations | 86 |
| III. Continuum Models of Porous Ductile Solids | 89 |
| IV. Localization of Plastic Flow | 96 |
| V. Cell Model Studies | 102 |
| VI. Formation and Growth of Cracks | 113 |
| VII. Effect of Yield Surface Curvature | 120 |
| VIII. Strain Rate Sensitive Material | 127 |
| IX. Creep Failure by Grain Boundary Cavitation | 134 |
| X. Discussion | 144 |
| References | 147 |

Complete Solutions to Some Mixed Boundary Value Problems in Elasticity

V. I. Fabrikant

| | |
|----------------------------|-----|
| I. Introduction | 153 |
| II. Theory | 155 |
| III. Illustrative Examples | 182 |

| | |
|-----------------|-----|
| IV. Discussion | 197 |
| V. Conclusion | 201 |
| Appendix A | 202 |
| Appendix B | 204 |
| Appendix C | 206 |
| Appendix D | 211 |
| Appendix E | 212 |
| Appendix F | 215 |
| Appendix G | 218 |
| Acknowledgement | 222 |
| References | 223 |

Convective and Radiative Heat Transfer in Porous Media

Chang-Lin Tien and Kambiz Vafai

| | |
|---|-----|
| I. Introduction | 226 |
| II. Forced Convection in Porous Media | 228 |
| III. Natural Convection in Porous Media | 236 |
| IV. Multiphase Transport in Porous Media | 252 |
| V. Radiative Heat Transfer in Porous Beds | 260 |
| Acknowledgments | 271 |
| References | 271 |

Solitons Induced by Boundary Conditions

C. K. Chu and Ru Ling Chou

| | |
|------------------------|-----|
| I. Introduction | 283 |
| II. Experiments | 284 |
| III. Numerical Results | 286 |
| IV. Theory | 297 |
| V. Conclusions | 301 |
| References | 302 |

Physical Limnology

Jörg Imberger and John C. Patterson

| | |
|---------------------------------------|-----|
| I. Introduction | 303 |
| II. Seasonal Behavior | 306 |
| III. Surface Fluxes | 321 |
| IV. The Surface Layer | 334 |
| V. Upwelling | 353 |
| VI. Differential Deepening | 370 |
| VII. Differential Heating and Cooling | 380 |

Contents

vii

| | |
|--|-----|
| VIII. Outflow | 391 |
| IX. Inflow | 405 |
| X. Mixing below the Surface Layer | 413 |
| XI. Modeling | 422 |
| XII. Reservoir Destratification by Bubble Aerators | 440 |
| XIII. Summary | 451 |
| Acknowledgements | 455 |
| References | 455 |
| AUTHOR INDEX | 477 |
| SUBJECT INDEX | 489 |
