#### A New Integrable Shallow Water Equation

Roberto Camassa, Darryl D. Holm, and James M. Hyman

I.	Introduction	1
Π.	The Green-Naghdi Equations	3
III.	The Unidirectional Model	9
IV.	Solution Dynamics	15
v.	Conservation Laws	23
VI.	An Isospectral Problem for the Unidirectional Model	27
VII.	Discussion	32
	Acknowledgments	32
	References	32

## The Onset and Development of Thermal Convection in Fully Developed Shear Flows

#### R. E. Kelly

I.	Introduction	35
II.	Rayleigh-Bénard Convection in Fully Developed Forced Flows	37
III.	Rayleigh-Bénard Convection in Fully Developed, Thermally Induced Flows	100
IV.	Concluding Remarks	105
	Acknowledgments	105
	References	106

#### **Vortex Element Methods for Flow Simulation**

Turgut Sarpkaya

Introduction	113
Theoretical Foundations and Numerical Schemes	116
Evolution and Applications of Vortex Element Methods	184
Concluding Remarks	222
Acknowledgments	230
References	230
	Introduction Theoretical Foundations and Numerical Schemes Evolution and Applications of Vortex Element Methods Concluding Remarks Acknowledgments References

# Micromechanics Constitutive Description of Thermoelastic Martensitic Transformations

Qing-Ping Sun and Keh-Chih Hwang

I. Introduction	249
II. Micromechanics and Thermodynamics of Thermoelastic Martensitic	
Transformations	251
III. Energy Changes Accompanying Deformation Processes	263
IV. Constitutive Relations	268
V. Applications to Deformation of Polycrystalline Shape Memory Alloys	282
VI. Concluding Comments	295
Acknowledgments	295
References	296
Author Index	299
Subject Index	307
