PREFACE	vii
-------------------	-----

Section 1

MOLECULAR BEAMS AND SURFACE INTERACTIONS

Chairman: Professor Edmond A. Brun
Faculté des Sciences de Paris, France

A Survey of Thermal Accommodation Coefficients	1
<i>J. P. Hartnett</i>	
A New Method for Measuring Sputtering in the Region near Threshold	29
<i>Daniel McKeown</i>	
The Sputtering of Potassium by Noble Gas Ions	39
<i>R. P. Stein and F. C. Hurlbut</i>	
The Interaction of Atoms with Solid Surfaces	51
<i>Bernard J. Wood and Henry Wise</i>	
A Method for the Study of Vector Velocity Distribution of Low Density Beams	61
<i>L. Marton, S. R. Mielczarek, and D. C. Schubert</i>	
Performance of a Supersonic Molecular Beam	67
<i>R. N. Zapata, H. M. Parker, and J. H. Bodine</i>	
Production of a Molecular Beam at a Very High Speed and Relatively Great Density; Development of a Molecular Gun	83
<i>F. Marcel Devienne and J. Souquet</i>	

Section 2

FREE-MOLECULE FLOW

Chairman: Professor Gordon N. Patterson, Director
Institute of Aerophysics, University of Toronto, Canada

Theoretical and Experimental Studies of Molecular Flow through Short Ducts	99
<i>D. H. Davis, L. L. Levenson, and M. Milleron</i>	
The Axial-Flow Compressor in the Free-Molecule Range	117
<i>Charles H. Kruger and Ascher H. Shapiro</i>	
Matrix Probability Theory of Free-Molecule Flow	141
<i>Yau Wu</i>	
The Influence of Specular Reflection on the Knudsen Conductance of Circular Capillaries	161
<i>Wendell C. De Marcus</i>	
On the Interaction between Stream and Body in Free-Molecule Flow . .	169
<i>Silvio Nocilla</i>	
Free-Molecule Flow over Nonconvex Surfaces	209
<i>Moustafa T. Chahine</i>	
The Effect of Molecule Recapture on Oscillatory Free-Molecule Flow . .	231
<i>Saul Abarbanel</i>	
The Free-Molecule Flow Field of a Moving Body in the Upper Atmosphere	245
<i>G. A. Bird</i>	

Section 3

FUNDAMENTALS OF KINETIC THEORY
AND FLUID MECHANICS

Chairman: Professor Harold Grad
New York University Institute of Mathematical Sciences

A New Expansion of the Differential Operator for the Time Development of Fluctuation Distributions	261
<i>Armand Siegel</i>	

The Solution of the Steady State Distribution in Nonequilibrium Processes; Ornstein-Uhlenbeck Processes	277
<i>Paul H. E. Meijer and Julius I. Bowen</i>	

On the Kinetic Theory of Steady Gas Flows	283
<i>Lawrence Sirovich</i>	

Thermal Agitation and Turbulence	307
<i>R. Betchov</i>	

Section 4

APPLICATION OF KINETIC THEORY

Chairman: Docent Pierre Welander
Institute of Meteorology, University of Stockholm, Sweden

On the Motion of Spherical Particles in Nonhomogeneous Gases	323
<i>L. Waldmann</i>	

Small Perturbations in the Unsteady Flow of a Rarefied Gas Based on Grad's Thirteen-Moment Approximation	345
<i>Daniel Kwok-I Ai</i>	

Plane Couette Flow by the Method of Moments	369
<i>Robert E. Street</i>	

Kinetic Theory Description of Plane Compressible Couette Flow	391
<i>Chung-Yen Liu and Lester Lees</i>	

The Effect of the Molecular Model on Solutions to Linearized Couette Flow with Large Knudsen Number	429
<i>D. R. Willis</i>	

Plane Poiseuille Flow	451
<i>S. Ziering</i>	

Rarefied Gas Flow between Two Parallel Plates	465
<i>Kichiro Takao</i>	

The Thickness of Shock Waves by the Two-Fluid Model Theory Extended to Rarefied Gases	475
<i>P. Glansdorff</i>	

- The Structure of Strong Shock Waves of Stable Monatomic Molecules . . . 481**
Toyoki Koga

Section 5

LOW DENSITY GAS DYNAMICS

Chairman: Dr. Eneas D. Kane
California Research Corporation, Richmond, California

- The Sharp Leading Edge Problem in Hypersonic Flow 501**
Hakuro Oguchi
- The Compressible Viscous Layer in Rarefied Hypersonic Flow 525**
Hung-Ta Ho and Ronald F. Probstein
- Molecular Flow Study of the Hypersonic Sharp Leading Edge Interaction 553**
A. F. Charwat
- Low Density Research in the Hypersonic Shock Tunnel 579**
Charles E. Wittliff and Merle R. Wilson
- The Thickness of Shock and Detonation Fronts and Rotational Relaxation
 at High Temperatures 593**
K. Hansen, D. F. Hornig, B. Levitt, M. Linzer, and B. F. Myers
- Shock Wave Structure in a Relaxing Diatomic Gas 603**
L. Talbot and S. M. Scala
- Low Density Shock Tube Studies of Reaction Rates Related to the High
 Altitude Hypersonic Flight Problem 623**
Shao-Chi Lin
- Measurements of Sphere Drag from Hypersonic Continuum to Free-
 Molecule Flow 643**
David J. Masson, Deane N. Morris, and Daniel E. Bloxson
- A Simple Method of Sphere Drag Measurement in Rarefied Supersonic
 Gas Flows 663**
Peter P. Wegener and Harry Ashkenas

Section 6

IONIZED GASES

Chairman: Dr. Raymond L. Chuan, Director
 University of Southern California Engineering Center, Los Angeles

Dynamical and Other Aspects of Cosmic Gases of Low Density	669
<i>Sydney Chapman</i>	
Interaction of a Charged Satellite with the Ionosphere	691
<i>A. H. Davis and I. Harris</i>	
Experimental Study of the Interaction of a Moving Body with a Plasma	701
<i>B. B. Meckel</i>	
Recent Research in the ARDE Low Density Wind Tunnel with a Plasma Jet Heater	715
<i>W. A. Clayden</i>	
AUTHOR INDEX	741
SUBJECT INDEX	746
