CONTENTS OF VOLUME ONE

Preface vii
Contents of Volume II xv

Section I

GAS-SURFACE INTERACTIONS

Current Developments in the Study of Gas-Surface Interactions 1
F. C. Hurlbut

I - 1 GAS-SURFACE INTERACTIONS - THEORETICAL

Preliminary Results of a Three-Dimensional Hard-Spheres Theory of Scattering of Gas Atoms from a Solid Surface 35
F. O. Goodman

Simple Classical Model for the Scattering of Gas Atoms From a Solid Surface: Additional Analyses and Comparisons 49
R. M. Logan, J. C. Keck and R. E. Stickney

Atomic Scattering From a Perfect Crystal, II 67
A. J. Howsmon

Calculations of the Interactions of Diatomic Molecules with Solid Surfaces 83
R. A. Oman

A Simple Model for Gas-Solid Energy Exchange 101
D. M. Gilbey

Quantum Theory of the Thermal Accommodation Coefficient and the Effect of Two-Quantum Transitions 109
R. T. Allen and P. Feuer

Perturbation Theories of the Thermal Accommodation Coefficient 121
D. M. Gilbey

Thermal Accommodation of Rare Gases on Clean Metal Surfaces - Comparison of a Simplified Classical Lattice Theory with Experiments 139
L. Trilling

I - 2 GAS SURFACE INTERACTIONS - EXPERIMENTAL - THERMAL ACCOMMODATION

A Collection of Some Controlled Surface Thermal Accommodation Coefficient Measurements 155
L. B. Thomas

Determination of the Thermal Accommodation Coefficients of Gases on Clean Surfaces at Temperatures Above 300°K by the Temperature Jump Method 163
D. V. Roach and L. B. Thomas

Accommodation Coefficients of Nitrogen and Helium on Nitrogen Covered Tungsten Between 325° - 496°K 173
H. Y. Wachman

I - 3 GAS SURFACE INTERACTIONS - EXPERIMENTAL - MOMENTUM ACCOMMODATION

Experiments on the Accommodation of Normal Momentum . 187
W. N. Mair, B. W. Viney and J. S. Colligon

Momentum Accommodation of Argon in the 0.06 to 5 ev Range 199
N. Abuaf and D. G. H. Marsden

Some Experimental Data on Momentum Accommodation Coefficients 211
W. J. Schaetzle

I - 4 GAS SURFACE INTERACTIONS - EXPERIMENTAL - SURFACE SCATTERING

Scattering of Molecular Beams of He, D_2, and H_2 From the (111) Plane of Ag 223
H. Saltsburg, J. N. Smith, Jr., and R. L. Palmer

Molecular Beam Scattering From Surfaces of Various Metals 239
J. J. Hinchen and E. F. Shepherd

Experimental Study of Scattering in Particle-Surface Collisions with Particle Energies of the Order of 1 ev . . 253
J. A. Alcalay and E. L. Knuth

Speed Distribution of Scattered Molecules After the Impact of a High Velocity Molecular Beam on a Solid Surface . . 269
F. M. Devienne, J. C. Roustan and R. Clapier

Section II

KINETIC THEORY

Kinetic Theory and Rarefied Gas Dynamics 289
J.-P. Guiraud

II - 1 KINETIC THEORY - BASIC STUDIES

Some Exact Solutions of Boltzmann's Equation with Spherical Symmetry 315
M. Lunc

On Diffusion Theory in a Gravitational Field 325
S. Ziering and M. Sheinblatt

On a Small Parameter Method for the Solution of Rarefied Gas Dynamics Problems 345
V. V. Struminskii

On the Principle of Maximum Entropy 359
M. N. Kogan

II - 2 KINETIC THEORY - SOUND PROPAGATION

Uni-Directional Perturbation Methods in Rarefied Gas Dynamics 369
S. S. Abarbanel

Some Results About a Kinetic Model with Velocity-Dependent Collision Frequency 381
C. Cercignani and F. Sernagiotto

Forced Sound Propagation Induced by a Fractionally Accommodating Piston 395
R. J. Mason

II - 3 KINETIC THEORY - COUETTE FLOW AND HEAT TRANSFER

Generalized Spatially-Uniform Distribution Functions and Heat Transfer in Rarefied Gas 411
V. P. Shidlovsky

Kinetic Theory of Heat Transfer for a Gas with Internal Degrees of Freedom 419
S. K. Hsu and T. F. Morse

Non-Linear Heat Transfer Between Two Parallel Plates According to a Model with Correct Prandtl Number . . . 441
C. Cercignani and G. Tironi

Analysis of Couette Flow and Heat Transfer Between Parallel Plates Enclosing Rarefied Gas by Monte Carlo. . 455
M. Perlmutter

The Discrete Ordinate Method for the Linearized Boundary Value Problems in Kinetic Theory of Gases . . 481
A. B. Huang and D. P. Giddens

The Problem of a Cylinder Rotating in a Rarefied Gas . . . 505
P. Bassanini, C. Cercignani and P. Schwendimann

Asymptotic Theory For Linearized Near-Continuum Gas Flows 517
R. M. Miura

Plane Couette Flow of Rarefied Binary Gas Mixtures . . . 535
H. G. Weinstein

II - 4 KINETIC THEORY - INTERNAL AND EXTERNAL FLOWS

Variational Approach to Rarefied Flows in Cylindrical and Spherical Geometry 555
C. Cercignani and C. D. Pagani

A Monte Carlo Approach to Transition and Free Molecular Flow Problems 575
J. O. Ballance

The High Mach Number Rayleigh Problem According to the Krook Model 589
C. K. Chu

Kinetic Theory Description of Flow over a Cylinder at Low Speeds 607
C. Y. Liu and R. Passamaneck

A Theory for the Slip-Flow Boundary Conditions Over a Surface Defined by Arbitrary Gas-Surface Interaction Parameters 623
S. F. Shen

II - 5 KINETIC THEORY - RELAXATION PHENOMENA AND SHOCK STRUCTURE

A Monte Carlo Calculation of a Chemically Reacting Gas 641
Y. Yoshizawa

Equilibration of a Single-Species Two-Temperature Gas Mixture 661
D. Mintzer and C. A. Ward

A Discrete Ordinate Technique for the Non-Linear Boltzmann Equation with Application to Pseudo-Shock Relaxation 675
M. Wachman and B. B. Hamel

Monte Carlo Evaluation of the Boltzmann Collision Integral 695
A. Nordsieck and B. L. Hicks

On the Solution of the Boltzmann Equation for a Two-Dimensional Gas 711
M. T. Chahine

Shock Structure Calculations by an Orthogonal Expansion Method 731
D. S. Butler and W. M. Anderson

A Kinetic Model for a Binary Mixture and Its Application to a Shock Structure 745
H. Oguchi

The Effect of Collisional Models Upon Shock Wave Structure 759
L. H. Holway, Jr.

On the Accuracy of Approximate Solutions of the Boltzmann Equation 785
S.-M. Yen and B. L. Hicks

A Note on Rotational Energy Diffusion in Shock Waves . . 803
L. Talbot and D. R. Willis

The Structure of the Distribution Function in Gas Kinetic Flows 813
R. Narasimha

II - 6 KINETIC THEORY - FREE EXPANSIONS

Distribution Function and Temperatures in a Monatomic Gas Under Steady Expansion into a Vacuum 819
R. H. Edwards and H. K. Cheng

Non-Equilibrium Effects in Spherical Expansions of Polyatomic Gases and Gas Mixtures 837
D. R. Willis and B. B. Hamel

An Asymptotic Theory for Steady Source Expansion of a Binary Gas Mixture 861
A. L. Cooper and G. K. Bienkowski
