

CONTENTS

PREFATORY CHAPTER

- On Material Structure and Human History, *Cyril Stanley Smith* 1

EXPERIMENTAL AND THEORETICAL METHODS

- Ion-Selective Electrodes, *J. Koryta* 13
Surface Second Harmonic Generation: A New Technique for Surface Studies, *Y. R. Shen* 69
Studies of the Dynamic Properties of Materials Using Neutron Scattering, *Stephen W. Lovesey and Colin G. Windsor* 87
Application of Impedance Spectroscopy to Materials Science, *Ian D. Raistrick* 343
Computer Modeling of Mass Transport Along Surfaces, *George H. Gilmer and Jeremy Q. Broughton* 487
Computer Simulation Studies of Transport in Solids, *C. R. A. Catlow* 517

PREPARATION, PROCESSING, AND STRUCTURAL CHANGES

- Plasma-Surface Interactions in Plasma-Enhanced Chemical Vapor Deposition, *Dennis W. Hess* 163
Materials Modification and Synthesis Under High-Pressure Shock Compression, *R. A. Graham, B. Morosin, E. L. Venturini, and M. J. Carr* 315
Preparation of Ultrasmooth Surfaces, *Norman J. Brown* 371
Nanostructures, *R. E. Howard, W. J. Skocpol, and L. D. Jackel* 441

PROPERTIES AND PHENOMENA

- Compositionally Graded Semiconductors and Their Device Applications, *Federico Capasso* 263
Mechanical Properties of Composition-Modulated Metallic Foils, *T. Tsakalakos and A. F. Jankowski* 293
Crack Stability and Toughness Characteristics in Brittle Materials, *Yiu-Wing Mai and Brian R. Lawn* 415

SPECIAL MATERIALS

- Oxynitride Glasses, *Sumio Sakka* 29
Composite Electroceramics, *R. E. Newnham* 47

viii CONTENTS (*continued*)

Ultralow-Loss Glasses, <i>M. E. Lines</i>	113
Low-Dimensional Chalcogenides as Secondary Cathodic Materials: Some Geometric and Electronic Aspects, <i>J. Rouxel and R. Brec</i>	137
Electrochromic Materials, <i>Tetsu Oi</i>	185
Recent Advances in Nonlinear Optical and Electro-optical Materials, <i>Chuang-tian Chen and Guang-zhao Liu</i>	203
Polymer Electrolytes, <i>Michel B. Armand</i>	245
Physical and Chemical Behavior of Welding Fluxes, <i>Charles A. Natalie, David L. Olson, and Milton Blander</i>	389
Rare Earth-Iron-Boron Materials: A New Era in Permanent Magnets, <i>J. F. Herbst, R. W. Lee, and F. E. Pinkerton</i>	467
