

## CONTENTS

### EXPERIMENTAL AND THEORETICAL METHODS

- Electron Spin Resonance (ESR) Microscopy in Materials Science,  
*Motoji Ikeya* 45
- NMR Methods for Solid Polymers, *H. W. Spiess* 131
- Metastable Growth of Diamond-like Phases, *John C. Angus,*  
*Yakin Wang, and Mahendra Sunkara* 221
- The Characterization of Polymer Interfaces, *T. P. Russell* 249
- The Adhesion Between Polymers, *H. R. Brown* 463
- Study of Sol-Gel Chemical Reaction Kinetics by NMR,  
*Roger A. Assink and Bruce D. Kay* 491
- Air/Liquid Interfaces and Adsorbed Molecular Monolayers  
Studied with Nonlinear Optical Techniques, *Viola Vogell and*  
*Y. R. Shen* 515

### PREPARATION, PROCESSING, AND STRUCTURAL CHANGES

- Containerless Undercooling and Solidification of Pure Metals,  
*D. M. Herlach* 23
- Microstructure and Mechanical Properties of Electroless Copper  
Deposits, *S. Nakahara and Y. Okinaka* 93
- Atomic Layer Epitaxy of III-V Electronic Materials, *A. Usui and*  
*H. Watanabe* 185
- Self-Heating Synthesis of Materials, *J. B. Holt and S. D. Dunmead* 305
- Molecular Films, *J. D. Swalen* 373
- Chemical Processes Applied to Reactive Extrusion of Polymers,  
*S. Bruce Brown* 409
- Growth and Characterization of Diamond Thin Films,  
*Robert J. Nemanich* 535

### PROPERTIES AND PHENOMENA

- Nanophase Materials, *R. W. Siegel* 559

### SPECIAL MATERIALS

- Defects in Hydrogenated Amorphous Silicon, *K. Winer* 1

Crystal Chemistry of Oligophosphates, <i>M. T. Averbuch-Pouchot and A. Durif</i>	65
Molecular Composites and Self-Reinforced Liquid Crystalline Polymer Blends, <i>G. T. Pawlikowski, D. Dutta, and R. A. Weiss</i>	159
The Palladium-Hydrogen System, <i>Ted B. Flanagan and W. A. Oates</i>	269
Thermodynamic Considerations in Superconducting Oxides, <i>R. Beyers and B. T. Ahn</i>	335
STRUCTURE	
Quasicrystals, <i>S. Ranganathan and K. Chattopadhyay</i>	437
INDEXES	
Subject Index	579
Cumulative Index of Contributing Authors, Volumes 17–21	589
Cumulative Index of Chapter Titles, Volumes 17–21	591
