

## CONTENTS

### PREFATORY

- Perfecting the Solid State, *Hans J. Queisser* 1

### EXPERIMENTAL AND THEORETICAL METHODS

- X-Ray Tomographic Microscopy (XTM) Using Synchrotron Radiation, *John H. Kinney and Monte C. Nichols* 121
- Z-Contrast Transmission Electron Microscopy: Direct Imaging of Materials, *S. J. Pennycook* 171
- RMC: Modeling Disordered Structures, *R. L. McGreevy and M. A. Howe* 217

### PREPARATION, PROCESSING, AND STRUCTURAL CHANGES

- Transient Liquid Phase Bonding, *W. D. MacDonald and T. W. Eagar* 23
- Microwave Sintering of Ceramics, *Joel D. Katz* 153
- Phase Transitions of Gels, *Yong Li and Toyochi Tanaka* 243
- Plasma Ion-Assisted Evaporative Deposition of Surface Layers, *S. Pongratz and A. Zöller* 279

### PROPERTIES AND PHENOMENA

- Ostwald Ripening, *P. W. Voorhees* 197

### SPECIAL MATERIALS

- Controlled Permeability Polymer Membranes, *W. J. Koros, M. R. Coleman, and D. R. B. Walker* 47
- Design and Properties of Glass-Ceramics, *G. H. Beall* 91

### INDEXES

- Subject Index 296
- Cumulative Index of Contributing Authors, Volumes 18–22 301
- Cumulative Index of Chapter Titles, Volumes 18–22 303
