

## CONTENTS

### PREFATORY CHAPTER

- Dislocations and Disclinations Past and Present: Some Personal Views and Reminiscences, *J. Friedel* 1

### EXPERIMENTAL AND THEORETICAL METHODS

- Laser Spectroscopy of Ultrafast Solid-State Phenomena, *D. von der Linde* 75  
Recent Advances in Solid-State NMR of Zeolites, *J. Klinowski* 189  
Precision X-Ray Techniques for Semiconductors, *A. T. Macrander* 283

### PREPARATION, PROCESSING, AND STRUCTURAL CHANGES

- Joining of Ceramics and Metals, *K. Sugauma, Y. Miyamoto, and M. Koizumi* 47  
Thermal Surface Modification by Electron Beam High-Speed Scanning, *S. Schiller and S. Panzer* 121

### PROPERTIES AND PHENOMENA

- Sliding Wear of Metals, *D. A. Rigney* 141  
Fast Diffusion in Semiconductors, *Ulrich M. Gösele* 257  
Tribocchemistry, *Traugott E. Fischer* 303

### STRUCTURE

- Hydrogen in Crystalline Semiconductors, *Jacques Chevallier and Marc Aucouturier* 219  
Field Ion Studies of Structure of GP Zones, *Ken-Ichi Hirano and K. Hono* 351

### SPECIAL MATERIALS

- Shape Memory Alloys, *T. Tadaki, K. Otsuka, and K. Shimizu* 25  
Aluminum-Lithium Alloys, *John W. Martin* 101  
Photorefractive Materials, *George C. Valley, M. B. Klein, Ruth Ann Mullen, Daniel Rytz, and Barry Wechsler* 165  
Semimagnetic and Magnetic Semiconductor Superlattices, *R. L. Gunshor, L. A. Kolodziejski, A. V. Nurmikko, and N. Otsuka* 325

viii CONTENTS (*continued*)

New Perspectives of Silicon Carbide: An Overview, with Special Emphasis on Noise and Space-Charge-Limited Flow, <i>Carolyn M. Van Vliet, Gijs Bosman, and Larry L. Hench</i>	381
