

## CONTENTS

### PREFATORY CHAPTER

- Ceramic Materials Science in Society, *W. David Kingery* 1

### EXPERIMENTAL AND THEORETICAL METHODS

- Dynamical Diffraction Imaging (Topography) with X-Ray  
Synchrotron Radiation, *M. Kuriyama, B. W. Steiner, and*  
*R. C. Dobbyn* 183
- Use of Laser Techniques to Study the Dynamics of Molecular-  
Surface Interaction, *J. Häger and H. Walther* 265
- Towards Unified Computer Models for Predicting Fracture of  
Solids, *Alan K. Miller* 439
- Fractal Phenomena in Disordered Systems, *R. Orbach* 497

### PREPARATION, PROCESSING, AND STRUCTURAL CHANGES

- Gas-Source Molecular Beam Epitaxy, *Morton B. Panish and*  
*Henryk Temkin* 209
- Photoelectrochemical Methods for III-V Compound  
Semiconductor Device Processing, *P. A. Kohl and*  
*F. W. Ostermayer, Jr.* 379
- Ion Beam Processing for Surface Modification, *J. K. Hirvonen* 401
- Rapid Omnidirectional Compaction (ROC) of Powder,  
*C. A. Kelto, E. E. Timm, and A. J. Pyzik* 527

### PROPERTIES AND PHENOMENA

- Chemically Induced Interface Migration in Solids, *Duk N. Yoon* 43
- Materials Synthesis by Mechanical Alloying, *C. C. Koch* 121
- The Structures of Electrodeposits and the Properties that  
Depend on Them, *Rolf Weil* 165
- Polymer Interdiffusion, *H. H. Kausch and M. Tirrell* 341
- Structural Relaxation in Metastable Strained-Layer  
Semiconductors, *Brian W. Dodson and Jeffrey Y. Tsao* 419

SPECIAL MATERIALS

Fluoride Glasses, <i>J. M. Parker</i>	21
Very Low Thermal Expansion Coefficient Materials, <i>Rustum Roy, D. K. Agrawal, and H. A. McKinstry</i>	59
Electroluminescent Display Materials, <i>H. Ohnishi</i>	83
Composite Electrolytes, <i>Nancy J. Dudney</i>	103
Hardmetals and Cermets, <i>P. Ettmayer</i>	145
Intermetallic Compounds for Strong High-Temperature Materials: Status and Potential, <i>R. L. Fleischer, D. M. Dimiduk, and H. A. Lipsitt</i>	231
Structural Properties of Ionomers, <i>C. W. Lantman, W. J. MacKnight, and R. D. Lundberg</i>	295
Crystal Chemistry and Properties of Mixed Valence Copper Oxides, <i>B. Raveau and C. Michel</i>	319
Synthesis, Stabilization, and Electronic Structure of Quantum Semiconductor Nanoclusters, <i>Michael L. Steigerwald and Louis E. Brus</i>	471
