

# Quadrupole Optics

(The electron optical properties of rectilinear orthogonal systems)

P. W. Hawkes

## Contents

|   |     |
|---|-----|
| 1. Introductory . . . . .   | 1   |
| 2. The paraxial properties of orthogonal systems . . . . .  | 1   |
| 3. Primary aberrations . . . . .  | 13  |
| 3.1 Variation of parameters . . . . .   | 15  |
| 3.2 Perturbation characteristics . . . . .  | 19  |
| 3.3 Integral equations . . . . .  | 34  |
| 3.4 Permissible aberrations and aberration patterns . . . . .   | 42  |
| 3.5 Mechanical aberrations . . . . .  | 49  |
| a) "Das Auflösungsvermögen sphärisch korrigierter elektrostatischer Elektronenmikroskope" by <i>W. E. Meyer</i> . . . . . | 49  |
| b) The work of <i>J. H. M. Deltrap</i> on magnetic quadrupoles . . . . .  | 53  |
| c) <i>A. V. Crewe's</i> study of the stigmatic magnetic doublet . . . . .   | 55  |
| d) <i>P. F. Meads's</i> analysis of any failure to achieve quadrupole symmetry . . . . .                                  | 56  |
| e) Comment . . . . .  | 57  |
| 4. Values of the cardinal elements and aberration coefficients of quadrupole lenses . . . . .                             | 57  |
| 4.1 Potential model . . . . .   | 57  |
| 4.2 Transfer matrices and cardinal elements . . . . .   | 60  |
| a) The rectangular model . . . . .  | 60  |
| b) The bell-shaped model . . . . .  | 61  |
| c) The modified rectangular model . . . . .   | 69  |
| d) The triangular model . . . . .   | 70  |
| e) Practical measurements and calculations . . . . .  | 72  |
| 4.3 Aperture aberration coefficients . . . . .  | 73  |
| a) The rectangular model . . . . .  | 74  |
| b) The bell-shaped model . . . . .  | 75  |
| c) Other models . . . . .   | 79  |
| d) Measurements . . . . .   | 79  |
| 4.4 Lens systems . . . . .  | 82  |
| a) The quadrupole doublet . . . . .   | 82  |
| b) The quadrupole triplet . . . . .   | 86  |
| c) Systems of four or more quadrupole lenses . . . . .  | 87  |
| 5. Chromatic aberration . . . . .   | 105 |
| 5.1 Introductory . . . . .  | 105 |
| 5.2 Geometrical aberrations . . . . .   | 106 |
| 5.3 Disparities between the field distributions . . . . .   | 117 |
| a) Small differences . . . . .  | 117 |
| b) Large differences: separated lenses . . . . .  | 118 |
| 6. Concluding remarks . . . . .   | 119 |
| References . . . . .  | 120 |
