A Survey of the Weak Interactions S. GASIOROWICZ	1
Semileptonic Decays V. F. MÜLLER	34
Non Leptonic Decays B. STECH	50
Current Algebra and Weak Interactions B. RENNER	60
The Decays of the $K_0 - \bar{K}_0$ System H. G. DOSCH	79
Questions Raised by $CP$ -Nonconservation P. K. KABIR	91
Relations for Semileptonic Weak Interactions Involving Photons W. KUMMER	113
Radiative Corrections to Weak Decays Involving Leptons RIAZUDDIN	126
Radiative Corrections to Weak Interactions J. ROTHLEITNER	161
Unconventional Models of Weak Interactions G. SEGRÈ	171
Weak Interactions at Small Distances H. PIETSCHMANN	193
Physical Symmetries in the Framework of Quantum Field Theory J. T. ŁOPUSZAŃSKI	201

# A Survey of the Weak Interactions\*

S. GASIOROWICZ

## Contents

Introduction . . . . .	1
I. The Weak Interactions before 1957. . . . .	1
II. Parity Nonconservation and the Form of the Beta Interaction . . . . .	5
III. Currents and their Symmetries. . . . .	14
IV. Nonleptonic Decays . . . . .	25
V. Concluding Remarks. . . . .	30
References . . . . .	31

# Semileptonic Decays

VOLKHARD F. MÜLLER\*

## Contents

1. Introduction . . . . .	34
2. The Effective Lagrangian . . . . .	35
a) Lepton Current . . . . .	36
b) Hadron Current . . . . .	36
3. Universality . . . . .	37
4. Baryon Decays . . . . .	39
a) Vector Current . . . . .	40
b) Axial Vector Current . . . . .	41
5. Open Questions . . . . .	44
6. Ademollo – Gatto Theorem . . . . .	45
References . . . . .	48

# Non Leptonic Decays

BERTHOLD STECH

## Contents

1. The Conventional Form of the Non Leptonic Weak Interaction . . . . .	50
2. Pole Model for $p$ -wave Hyperon Decay . . . . .	52
3. $s$ -wave Decay Diagramms . . . . .	54
4. Current Algebra Treatment . . . . .	56
5. Test of Charged Current Coupling . . . . .	58
References . . . . .	59

# **Current Algebra and Weak Interactions**

**B. RENNER**

## **Contents**

Summary . . . . .	60
1. The Basic Principles of Current Algebra . . . . .	60
2. Sum Rule Tests . . . . .	64
3. Low Energy Theorems . . . . .	67
4. $K_{13}$ Decay . . . . .	69
5. $K_{14}$ Decay . . . . .	72
6. The Structure of Low Energy Theorems . . . . .	74
7. The Open Questions . . . . .	77
References . . . . .	78

# The Decay of the $K_0$ — $\bar{K}_0$ System

H. G. DOSCH

## Contents

I. Introduction . . . . .	79
II. The Weisskopf-Wigner Method . . . . .	80
III. The $K_0$ — $\bar{K}_0$ System . . . . .	85
IV. The Exponential Decay . . . . .	87
References and Footnotes . . . . .	90

# Questions Raised by *CP*-Nonconservation

P. K. KABIR

## Contents

The Phenomenological Description . . . . .	91
A Simple Model . . . . .	96
$K^0 \rightarrow 2\pi$ Decays . . . . .	97
Tests of <i>T</i> -Invariance . . . . .	100
The Dynamical Origin of <i>CP</i> -Noninvariance . . . . .	102
Superweak Theories . . . . .	103
Milliweak Theories . . . . .	104
Millistrong Theories . . . . .	105
$\alpha$ -particles and Related Chimera . . . . .	107
Summary . . . . .	109
Appendix A . . . . .	110
References and Footnotes . . . . .	112

# **Relations for Semileptonic Weak Interactions Involving Photons**

**W. KUMMER**

## **Contents**

Abstract . . . . .	113
1. Introduction . . . . .	113
2. General Considerations . . . . .	115
3. Vector Current in $\pi \rightarrow e\bar{v}\gamma$ . . . . .	117
4. The Vector Current in $\pi^+ \rightarrow \pi^0 e\bar{v}\gamma$ . . . . .	118
References and Footnotes . . . . .	124

# Radiative Corrections to Weak Decays Involving Leptons

RIAZUDDIN

## Contents

1. Introduction . . . . .	126
2. Radiative Corrections to the $\beta$ -Decay of Point-like Particles . . . . .	129
3. Radiative Corrections to $ \Delta Y  = 0$ Semi-leptonic Processes . . . . .	136
a) Divergence Problems . . . . .	136
b) Elimination of Divergences in Certain Models . . . . .	145
c) Numerical Results . . . . .	148
d) Applications . . . . .	150
4. Radiative Corrections to $ \Delta Y  = 1$ Semi-leptonic Processes . . . . .	156
a) Divergences in Radiative Corrections to $ \Delta Y  = 1$ Processes . . . . .	156
b) Radiative Corrections to $K_{l3}$ Decay . . . . .	157
c) Radiative Corrections to $K_{e2}^\pm/K_{\mu 2}^\pm$ Ratio . . . . .	158
References and Footnotes . . . . .	159

# Radiative Corrections to Weak Interactions

J. ROTHLEITNER

## Contents

I. Introduction . . . . .	161
II. Radiative Corrections to Leptonic Processes . . . . .	163
III. Radiative Corrections to Semileptonic Decays . . . . .	168
References . . . . .	170

# Unconventional Models of Weak Interactions

GINO SEGRÈ\*

## Contents

I. Introduction . . . . .	171
II. Renormalizable Models of Weak Interactions . . . . .	172
Model A: i) Leptonic Interactions . . . . .	172
ii) Semi-leptonic Interactions . . . . .	174
iii) Non-leptonic Weak Interactions . . . . .	176
Model B . . . . .	177
III. Non-Renormalizable Models . . . . .	178
Model A: Strongly Interacting $W$ Mesons . . . . .	179
Model B 1: Several $W$ Mesons. i) Schizon Models . . . . .	181
Model B 2: i) Model with Cutoff $A \sim \frac{1}{\sqrt{G_F}}$ . . . . .	184
Model C: $W$ Mesons and Scalar Mesons with Derivative Coupling . . . . .	189
IV. Conclusion . . . . .	190
References . . . . .	191

# **Weak Interactions at Small Distances\***

**H. PIETSCHMANN**

## **Contents**

Abstract . . . . .	193
1. Introduction . . . . .	193
2. Nonlocal Effects in Weak Interactions . . . . .	194
3. Digression on Higher Orders . . . . .	196
4. Semi-leptonic Processes . . . . .	196
5. $\mu$ -decay . . . . .	198
6. Conclusion . . . . .	199
References . . . . .	200

# **Physical Symmetries in the Framework of Quantum Field Theory**

**JAN T. ŁOPUSZAŃSKI**

## **Contents**

1. Introductory Remarks . . . . .	201
2. Assumptions . . . . .	203
3. Main Results . . . . .	204
4. Discussion of the Results . . . . .	208
References . . . . .	213
