Weak Interactions in Nuclear Physics*

H. PRIMAKOFF

Contents

I.	Introduction	6
II a)	Semileptonic Weak Processes in Nuclei — “Meson-Exchange” and/or “Bound Nucleon-Isobar” Effects	7
II b)	Semileptonic Weak Processes in Nuclei — Nuclear Two-Neutrino and No- Neutrino Double-Beta Decay	12
II c)	Semileptonic Weak Processes in Nuclei — “Second-Class” Hadronic Weak Currents and Time-Reversal Noninvariance.	16
II d)	Semileptonic Weak Processes in Nuclei — Goldberger-Treiman Relation, Adler-Weisberger Sum Rule, Weinberg-Tomozawa Formula	19
III.	Nonleptonic Weak Processes in Nuclei — Space-Inversion Noninvariant Weak Nuclear Forces	25
	References and Remarks	26

Weak Interactions at High Energies

G. v. GEHLEN

Contents

1. Introduction	29
2. Intermediate Vector Boson Theory	30
3. Production of W in Neutrino Experiments	32
4. Two Neutrino Hypothesis	35
5. Violation of Unitarity in Lowest Order Weak Interactions	35
6. Tests of the Locality of the Lepton Interaction	37
7. The Decay $K_L \rightarrow \mu^+ + \mu^-$ in Second Order Weak Interaction	38
8. Other Estimates of the Weak Interaction Cut-Off	42
9. Conclusion	43
References	44

Cabibbo Angle and $SU_2 \times SU_2$ Breaking

R. GATTO

Contents

Introduction and Summary	46
I. Leading Weak Divergences at Lowest Order	48
1. Second Order Virtual W -Process	48
2. Bjorken-Johnson-Low Limit	51
3. Quadratic Divergent Terms	52
4. Graphical Interpretation	52
5. $SU_3 \times SU_3$ Breaking	53
6. Charge-divergence Commutators	54
II. Chiral Symmetry Breaking	56
7. $SU_3 \times SU_3$ Breaking: Spectral Sum Rules	56
8. $SU_3 \times SU_3$ Breaking into SU_2	59
9. Addition of an Isospin-breaking Term	63
10. Description in Terms of Fictitious Quark Masses	65
III. Leading Weak Divergences. Free Quark Model	65
11. The Leading Weak Divergences (Second Order)	65
12. Leading Divergences at Higher Weak Orders	67
13. Higher Orders in the free Quark Model (free Quarks Coupled to W)	69
IV. Leading Weak Divergences. Schemes of Current Algebra	72
14. Fourth Order Calculation of Leading Divergences by Current Algebra Techniques	72
15. Compound Field Algebra (CFA) and Leading Weak Divergences	81
16. Leading Divergences at Higher Orders	87
V. Further Speculations	93
17. An Alternative Approach	93
18. Discussion and Speculations	100
VI. Related Work	103
a) Problem of Weak Divergences	104
b) $SU_3 \times SU_3$ -Breaking	104
c) Origin of the Cabibbo Angle	104
