High Energy Photoproduction of Pseudoscalar Mesons

J. FRØYLAND

Contents

Introduction	1
General Considerations	3
Absorption Type Models	6
Kinematics for $\gamma N \rightarrow 0^{-\frac{1}{2}+}$	9
Isospin for πN Photoproduction.	13
Construction of Models	13
Photoproduction of π^0	13
η Photoproduction	18
$\pi^\pm$ Photoproduction	20
Photoproduction of K Mesons	26
References	28

Some Aspects of Vector Meson Photoproduction on Protons

K. SCHILLING

Contents

Abstract	31
1. Introduction	31
2. Non-Diffractive Contributions	33
2.1. Some $SU(3)$ Arguments about Couplings	33
2.2. Experimental Checks for $\mathbb{P}$ Exchange	34
a) Energy Dependence	34
b) t Channel Isospin	34
c) t Channel Normality	36
3. Diffractive Models for $\gamma p \rightarrow \pi^+ + \pi^- p$	38
3.1. The Vector Dominance Approach	38
3.2. The Multiperipheral Model	38
3.3. The Interference Model	40
3.4. Final State Interaction Model	41
3.5. Veneziano Approach	42
3.6. F.E.S.R. Approach	50
3.7. Why is ϱ' Photoproduction Suppressed?	52
4. Summary and Conclusions	54
References	55

Vector Meson Dominance, Photo- and Electroproduction from Nucleons*

D. SCHILDKNECHT

Contents

1. Basic Assumptions of the Vector Dominance Model	57
1.1. Generalities on Electromagnetic Interactions	57
1.2. Existence of Vector Meson	58
1.3. Current Field Identity	59
1.4. Smoothness Assumptions of the Vector Meson Dominance Model	61
1.5. Current Field Identity in Lagrangian Models, Dispersion Relations and Historical Remarks	64
1.6. General Remarks on Tests of Vector Meson Dominance	64
2. The Coupling Constants $\gamma_\rho, \gamma_\omega, \gamma_\phi$. Brief Remarks on e^+e^- Annihilation beyond ρ^0, ω, ϕ	65
3. Single Pion and $\pi A(1236)$ Photo- and Electroproduction	68
3.1. Single Pion Photoproduction	68
3.2. Single Pion Electroproduction	71
3.3. $\pi A(1236)$ Electroproduction	77
3.4. A Brief Remark on the Total Longitudinal Electroproduction Cross Section	81
4. Vector Meson Dominance Predictions from Smoothness of Invariant Amplitudes	81
5. The Total Photoproduction and Electroproduction Cross Section and Production of Vector Meson	86
5.1. Photo- and Electroproduction of Vector Mesons	86
5.2. The Total Electroproduction Cross Section	89
6. A Few Summarizing and Concluding Remarks	92
Footnotes and References	93

$\varrho - \omega$ Mixing

F. M. RENARD

Contents

I. Introduction	98
II. The Mixing Formalism	101
III. Models for the Mixing Parameter	104
IV. Vector Meson Decays	106
V. e^+e^- Reactions	108
VI. Vector Meson Photoproduction	110
VII. Other Processes Involving Vector Mesons	113
VIII. Conclusion	116
Appendix A. General Formulas for Mass- and Current Mixing	117
Appendix B. Helicity Dependence of Vector Meson Productions	118
References	119

Exotic Electromagnetic Currents

A. DONNACHIE

Contents

1. Introduction	121
2. Pion Photoproduction and π -Radiative Capture.	126
3. Deuteron Photodisintegration and Neutron-Proton Radiative Capture	135
4. Inelastic Electron Scattering off a Polarized Target	138
5. The Neutron Electric Dipole Moment	141
6. Conclusion	142
References	143

Regge Analysis and Dual Absorptive Model

A. P. CONTOGOURIS

Contents

1. Introduction	145
2. The Weak Cut Model	146
3. The Strong Cut Reggeized Absorption Model	148
4. The Dual Absorptive Model (DAM) [4]	149
5. Regge Analysis and DAM for Certain Quasi-Elastic Reactions.	153
References and Footnotes	162

The Eikonal Model for Regge Cuts in Pion-Nucleon Scattering^{*}

P. D. B. COLLINS and F. D. GAULT

With 11 Figures

Contents

I. Introduction	163
II. The Eikonal Model	165
III. Models for πN Scattering	171
IV. The Pomeronon Intercept	185
V. Conclusions	187
References	188
