Study of Nuclear Structure by Muon Capture H. ÜBERALL	1
Emission of Particles Following Muon Capture in Intermediate and Heavy Nuclei P. SINGER	39
The Two and Three Body Problem J. S. LEVINGER	88
Classified Index of Authors and Titles (Volumes 36—71)	241

Study of Nuclear Structure by Muon Capture

H. ÜBERALL

Contents

Introduction	1
I. Total Muon Capture Rates	2
II. Neutron Angular Distribution	6
III. The Giant Resonance Mechanisms	9
IV. Partial Decay Rates; Particle and Photon Emission	16
V. Angular Correlations	32
References	35

Emission of Particles Following Muon Capture in Intermediate and Heavy Nuclei*

PAUL SINGER

Contents

I. Introduction	39
II. Neutron Emission	40
2.1 General	40
2.2 Neutron Evaporation and Neutron Multiplicities	41
2.3 Direct Neutrons and Neutron Energy Spectrum	52
2.4 Remarks	64
III. Charged Particle Emission	65
3.1 General	65
3.2 Surface Correlation Effects (Pseudodeuteron Model)	68
3.3 Volume Correlation Effects	69
3.4 Recent Experiments	71
3.5 Remarks	76
IV. Neutron and γ Asymmetry	78
References	85

The Two and Three Body Problem

J. S. LEVINGER*

Contents

I.	Two-Nucleon and Three-Nucleon Systems	89
1.1	Introduction	89
1.2	“One-Nucleon Problem”	90
1.3	Nucleon-Nucleon Scattering	91
1.4	Nucleon-Nucleon Wave Function	94
1.5	Trinucleon	95
1.6	Summary	96
II.	A Critique of Experimental Knowledge of the Two-Nucleon System	96
2.1	Introduction	96
2.2	Meson Theory	99
2.3	Phenomenological Potentials	101
2.4	Electron-Deuteron Scattering	109
2.5	Charge Symmetry	117
2.6	Summary	118
III.	Two-Body Scattering	119
3.1	Introduction	119
3.2	Scattering Amplitude	119
3.3	Separable t -Matrix	121
3.4	Non-Local Potential	122
3.5	Separable Potential	124
3.6	Epistemological Remarks	130
3.7	The Unitary Pole Approximation (UPA)	135
IV.	More Complicated Separable Potentials	150
4.1	Introduction	150
4.2	UPA for Non-Central Forces	150
4.3	Rank- N Separable, Central Case	159
4.4	Rank- N Separable, Non-Central Case	164
V.	Solution of Trinucleon for Separable t -Matrix	166
5.1	Introduction	166
5.2	Faddeev Equation	167
5.3	Separable Central Potential	170
5.4	Numerical Methods and Results	171
5.5	Non-Central Separable Potential	174
5.6	Higher Rank Non-Central Potentials	176
5.7	Summary	179

* *Dedication:* I dedicate this report to my dear wife Gloria, and son Jody, who graciously consented to leave East Greenbush, New York and live in Paris for a year, so that I could work on this manuscript at the Institut de Physique Nucléaire, Orsay. J. S. Levinger

VI. Survey of Trinucleon Calculations by Other Methods	179
6.1 Introduction	179
6.2 <i>t</i> -Matrix Perturbation Theory	180
6.3 Faddeev Equations for Local Potentials	183
6.4 Variational Expansions in Ordinary Space	186
6.5 Variational Expansion in Hyperspherical Harmonics	191
6.6 Brueckner-Bethe Method	196
6.7 Triton Energy for Reid Potential	197
6.8 Coulomb Energy Difference	198
6.9 Comparison with Experimental Triton Energy	199
6.10 Trinucleon form Factor	204
6.11 Summary	209
VII. Nucleon-Deuteron Scattering, and Other Problems	209
7.1 Introduction	209
7.2 Survey of $n-d$ Scattering	210
7.3 Neutron-Deuteron Scattering Lengths	213
7.4 Elastic $n-d$ Scattering	217
7.5 Inelastic $n-d$ Scattering; New Methods	221
7.6 Alpha Particle, etc.	224
7.7 Comparison of Different Methods of Calculation	228
7.8 The Gordian Knot Again	231
References	234
