

Contents

1. Introduction	1
2. Electron-Positron Storage Rings	3
2.1 Event Rate	4
2.2 Luminosity	5
2.3 Energy Spread	8
2.4 Beam Polarization	8
2.5 Examples of Existing Storage Rings	9
2.6 Types of Storage Ring Detectors	12
2.7 Experimental Background Problems	18
3. Purely Electromagnetic ee Interactions	21
3.1 General Remarks	21
3.2 Tests of Quantum Electrodynamics	22
4. Phenomenology of Hadron Production	30
4.1 General Remarks	30
4.2 Properties of the One-Photon Channel	30
4.3 σ^{tot} in the Quark-Parton Model	31
5. The Total Cross Section	36
6. e^+e^- Annihilation at Low Energies	41
6.1 Excitation of ρ , ω , ϕ	41
6.2 Evidence for Vector States Between 1 and 2 GeV	43
6.3 The Pion Form Factor	48
6.4 Four-Pion Production	53
6.5 Six-Pion Production	56
7. The New Particles J/ψ and ψ'	57
7.1 J/ψ Production Cross Section and Width.....	58
7.2 Spin and Parity of the J/ψ	61

7.3	G Parity and Isospin of J/ψ	65
7.4	ψ' Production and Decay Properties	70
7.5	SU_3 Assignment of J/ψ and ψ'	73
7.6	Inclusive Particle Spectra from J/ψ and ψ'	77
8.	Radiative Decays of J/ψ and ψ'	83
8.1	The Decays $J/\psi \rightarrow \gamma\pi^0, \gamma\eta$ and $\gamma\eta'$	83
8.2	The Radiative Decays $J/\psi \rightarrow f\gamma, f'\gamma$ and $\pi^+\pi^-\gamma, K^+K^-$	89
8.3	Discussion	95
8.4	$J/\psi, \psi'$ Contributions to Photo- and Electroproduction	98
9.	Search for Other Narrow Vector States	100
10.	The Quark Model Interpretation of J/ψ and ψ'	105
10.1	$c\bar{c}$ Spectroscopy	105
10.2	Vector States	107
10.3	P-Wave States	112
10.4	Pseudoscalar States	122
10.5	The 3.45 GeV Level	129
11.	Charmed Mesons	130
11.1	The D Mesons	135
11.2	The F Mesons	139
11.3	Semileptonic Decays of Charmed Particles	146
12.	The Heavy Lepton τ	157
12.1	Expected Properties of a Heavy Lepton	157
12.2	Leptonic Decays of the τ	161
12.3	Semihadronic Decays of the τ	178
12.4	Summary of the τ Properties	186
13.	The Γ Family	190
14.	Inclusive Hadron Production	201
14.1	Basic Formulae	201
14.2	Hadron Multiplicity	205
14.3	Average Particle Energy	206
14.4	Momentum Spectra Without Particle Separation	208
14.5	Momentum Spectrum of π^\pm, K^\pm and \bar{p}	210
14.6	Particle Multiplicities	213
14.7	Test for Scaling	214

14.8	Charm Contribution to π^\pm and K^\pm Production	218
14.9	e^+e^- Annihilation and Inelastic ep Scattering	218
14.10	Inclusive Rho Production	220
14.11	Inclusive D Production	222
15.	Jet Formation	224
15.1	Angular Distributions	224
15.2	Jet Structure	227
15.3	Particle Emission in the Jet Frame	231
15.4	Jet Studies in the Υ Region	237
16.	The Next Generation of e^+e^- Colliding Rings and the First Results from PETRA	249
