

Contents

1. Introduction	1
1.1 Physics with Two Photons	2
1.2 The Historical Development of Two-Photon Physics	4
1.3 Organization of the Review	4
2. Kinematics and Cross Section of Two-Photon Reactions	6
2.1 The Kinematics of the Reaction $e^+e^- \rightarrow e^+e^-X$	6
2.2 The Helicity Structure of the Two-Photon Cross Section	8
2.3 Approximations for the Cross Section Formula	10
2.4 Special Kinematical Situations; Tagging of the Photons	13
2.4.1 Double-Tagging	14
2.4.2 Single-Tagging	14
2.4.3 No-tag Experiments	16
3. Detectors for Two-Photon Physics	18
3.1 Detectors at e^+e^- Storage Rings	18
3.2 Tagging Devices	21
3.3 Some Remarks on Particle Identification	24
3.4 Description of the Detectors	25
4. Two-Photon QED Processes	30
4.1 QED Cross Sections	30
4.2 Measurements	33
5. Two-Photon Production of Meson and Baryon Pairs	37
5.1 Non-Resonant Meson Pair Production at Low Energies	37
5.2 Hadron Pair Production above 2 GeV	40
5.2.1 A Measurement of Hadron Pair Production above 2 GeV	41
5.2.2 Proton-Antiproton Pair Production	43
6. The Coupling of Two Photons to Meson Resonances	46
6.1 Introduction	46
6.2 Meson Resonances in the Quark Model	51
6.3 The Pseudoscalar Mesons	53
6.3.1 The Two-Photon Coupling of the π^0	53
6.3.2 The Two-Photon Coupling of the η	54
6.3.3 The Two-Photon Coupling of the η'	55

6.3.4	The Q^2 Dependence of the $\gamma\gamma$ Coupling of Pseudoscalars	57
6.3.5	Discussion of the Results for Pseudoscalar Mesons	58
6.3.6	Upper Limits on the Two-Photon Width of the $\iota(1440)$	61
6.4	The Tensor Mesons	61
6.4.1	Introduction	61
6.4.2	The Two-Photon Coupling of the $f(1270)$	64
6.4.3	The Two-Photon Coupling of the $A_2(1320)$	74
6.4.4	The Two-Photon Coupling of the $f'(1515)$	75
6.4.5	Other 2^{++} Mesons?	78
6.4.6	Discussion of the Results for Tensor Mesons	79
6.5	The Two-Photon Coupling of Scalar Mesons	80
6.6	Remarks on the Two-Photon Coupling of Charmonium States	83
6.7	The Four Pion Final State and Vector Meson Pair Production	86
6.7.1	$\rho^+\rho^-$ Production by Two Photons Near Threshold	86
6.7.2	The Two-Photon Production of $\rho^+\rho^-$, $\rho^0\omega$, $\omega\omega$	97
6.7.3	Discussion of the Results on $\gamma\gamma$ Production of Vector Meson Pairs	100
6.8	Observation of a Narrow Structure at 2.1 GeV in $\gamma\gamma \rightarrow \pi^+\pi^-\pi^+\pi^-$	102
7.	The Total Cross Section for Two-Photon Production of Hadrons	104
7.1	Theoretical Predictions	104
7.2	The Experimental Method to Determine $\sigma(\gamma\gamma \rightarrow \text{Hadrons})$	107
7.2.1	The Double-Tag Approach	107
7.2.2	The Single-Tag Approach	108
7.2.3	The Model for Hadron Production by Two Photons	110
7.3	Experimental Results on $\sigma(\gamma\gamma \rightarrow \text{Hadrons})$	112
7.3.1	A Double-Tag Analysis	112
7.3.2	Single-Tag Analyses	113
7.4	Discussion of the Results	120
8.	Hard Scattering Processes in Two-Photon Production of Hadrons	122
8.1	General Remarks	122
8.2	Theoretical Description of Hard Scattering Processes	124
8.2.1	Introduction	124
8.2.2	The Born Approximation for Hadron Production by Two Photons	126
8.2.3	Other Hard Scattering Processes	127
8.2.4	Higher Twist Contributions	129
8.2.5	QCD Corrections to the Two-Jet Cross Section	129
8.3	Experimental Results	133
8.3.1	The Experimental Method	133
8.3.2	The TASSO Analysis	134
8.3.3	The JADE Analysis	138
8.3.4	The Q^2 Dependence of the Transverse Momentum Distributions	140

8.4	Discussion of the Results	143
8.4.1	Comparison to Theoretical Predictions	143
8.4.2	Integrally versus Fractionally Charged Quarks	144
9.	The Structure Functions of the Photon	146
9.1	The Definition of the Structure Functions of the Photon	147
9.2	The Physical Meaning of the Structure Functions	149
9.2.1	The Hadronic Component of the Photon	149
9.2.2	The Pointlike Coupling of the Photon	150
9.3	The QCD Evaluation of the Photon Structure Functions	152
9.3.1	The Leading Order QCD Result	153
9.3.2	Higher Order QCD Corrections	155
9.4	Experimental Results on the Photon Structure Function	157
9.4.1	The Analysis Methods	158
9.4.2	The PLUTO Measurement	161
9.4.3	The JADE Measurement	163
9.4.4	Most Recent Results	165
9.5	Concluding Remarks	167
10.	Summary	168
	References	173
	Subject Index	183
