

Contents

1. Introduction	1
2. Surface Plasmons on Smooth Surfaces	4
2.1 Fundamental Properties: Dispersion Relation, Extension and Propagation Length for the Electromagnetic Fields of the Surface Plasmons	4
2.2 Excitation of Surface Plasmons by Electrons and by Light ..	7
2.3 Internal and Radiation Damping	14
2.4 Field Enhancement Due to Surface Plasmons	16
2.5 Determination of $\epsilon(\omega)$ In Situ Using the ATR Minimum	19
2.6 Coating of the Metal Surface with a Dielectric Film; Thickness Dispersion of Surface Plasmons	19
2.7 Surface Plasmons on Thin Films; Thickness Dependence of the Damping	24
2.8 Second Harmonic Generation (SHG)	30
2.9 Influence of Corrugation	33
2.10 "Localized" Plasmons and Enhancement	37
3. Surface Plasmons on Surfaces of Small Roughness	40
3.1 Resonant Light Emission Observed with the ATR Device ..	40
3.2 Measurement of the Roughness	42
3.3 Directional Scattering	49
3.4 Surface Roughness and "Volume" Roughness	51
3.5 Roughness Measurement with the Tunnel Electron Microscope	54
3.6 Roughness on Planar Wave Guides	55
3.7 Enhancement of Inelastic Light Scattering (Brillouin Scattering)	56
4. Surfaces of Enhanced Roughness	58
4.1 The Change of the Properties of the Surface Plasmons Due to Roughness	58
4.2 Determination of the Enhanced Roughness	61
4.3 Discussion of the Theoretical Situation	62

4.4	The Attenuated Total Reflection Minimum as a Function of Damping	65
4.5	Enhancement and Roughness; Second Harmonic Generation (SHG)	65
4.6	Efficiency of the Plasmon-Photon Coupling	70
4.7	Light Emission from Inelastic Electron Tunneling in MOM and MIS Junctions	70
5.	Light Scattering at Rough Surfaces Without an ATR Device	73
5.1	The Angular Distribution of Light Scattered at a Rough Surface	74
5.2	Scattering of X-Rays	82
5.3	Measurement of the Reflectivity Deficit as a Function of the Wavelength	84
6.	Surface Plasmons on Gratings	91
6.1	Emission of Light from Sinusoidal Gratings Supported by Surface Plasmons	92
6.2	Dispersion Relation of Surface Plasmons on Sinusoidal Surfaces	96
6.3	Reflection of Light at Gratings with Excitation of Surface Plasmons	99
6.4	Influence of a Second Harmonic in the Grating Profile	105
6.5	Resonance Enhancement of the Electromagnetic Field	107
6.6	Second Harmonic Generation on Gratings	109
6.7	Coupling of Surface Plasmons Via Roughness	110
7.	Conclusion	117
Appendix	118
I)	Derivation of the Dispersion Relation of SPs on a Surface of a Semi-Infinite Solid	118
II)	Derivation of the Dispersion Relation for SPs on a Thin Film (d_1) with Asymmetric Environment ($\epsilon_0 \epsilon_1 \epsilon_2$), e.g., Quartz/Metal Film/Air	120
III)	Enhancement Factor	122
IV)	Collection of the Dielectric Functions of Gold and Silver	123
References	129
Subject Index	135
