

# Contents

<b>1. Introduction</b>	1
<b>2. Experimental</b>	4
2.1 The Thermal Energy Helium Beam: Production and Detection	4
2.2 The Experimental Set-Up	6
2.3 Sample Preparation	7
<b>3. The Scattering Mechanism</b>	9
3.1 The He-Substrate Interaction Potential	9
3.2 The He-Adsorbate Interaction Potential	12
3.3 The Mechanism for Diffuse Scattering from Adsorbates	14
3.4 The Angular Dependence of the Cross-Section	20
3.5 Coverage Dependence of the He Reflectivity	22
3.5.1 Perfectly Diffuse Scattering; Adsorbates Randomly Distributed on Lattice Sites	23
3.5.2 Adsorbates with Non-Negligible Reflectivity	26
3.5.3 First Layer Vacancies	28
<b>4. Diffuse Scattering as a Tool to Probe the Lateral Distribution of Adatoms and Vacancies (Homogeneous Systems)</b>	29
4.1 The Overlap Approach	29
4.2 The Applicability of the Overlap Approach	31
4.3 Repulsive Interactions: CO/Pt(111)	32
4.4 Attractive Interaction Between Thermally Immobile Vacancies on Pt(111) at $T_s = 80\text{ K}$	34
4.5 Attractive Interaction Between Mobile Adsorbates: Xe/Pt(111)	36
<b>5. Diffuse Scattering as a Probe of the Lateral Distribution in Heterogeneous Systems</b>	40
5.1 Adsorption on Surfaces with Defects	40
5.2 Coadsorption	45
5.2.1 Xe/CO/Pt(111) – Attractive Interaction	46
5.2.2 H/CO/Pt(111) – Repulsive Interaction	47

<b>6. The Characterization of Stepped Surfaces by Means of Coherent and Diffuse Helium Scattering .....</b>	<b>52</b>
6.1 Introduction .....	52
6.2 Helium Diffraction from Regularly Stepped Surfaces .....	54
6.3 Helium Diffraction from Randomly Stepped Surfaces; a Qualitative Description .....	57
6.4 The Cross-Section for Diffuse Scattering from Steps .....	60
6.5 The Influence of Temperature on Surface Morphology During Ion Bombardment .....	62
6.5.1 In-phase Peak Height During Ion Bombardment at Various Temperatures .....	63
6.5.2 Anti-phase Peak Height During Ion Bombardment at Medium Surface Temperatures .....	64
6.5.3 Anti-phase Peak Height at Higher Temperatures .....	67
6.6 Investigation of Crystal Growth .....	71
<b>7. TEAS as a Probe of Thermal Roughness on Monocrystalline Surfaces .....</b>	<b>73</b>
7.1 Introduction .....	73
7.2 Surface Structure at Higher Temperatures .....	74
7.2.1 The He Peak Width and Height .....	76
7.2.2 Peak Profile Analysis at Large Parallel Momentum Change .....	78
7.3 The Anomalous Behaviour of the Specular He Peak Height from Cu(011) Versus Surface Temperature .....	81
<b>8. TEAS as a Probe of Surface Coverage .....</b>	<b>83</b>
8.1 The H/Pt(111) System .....	84
8.1.1 The Calibration Function for Highly Reflecting Scatterers .....	84
8.1.2 The Dissociative Adsorption of Hydrogen on Pt(111)	88
8.2 Equilibrium and Desorption Experiments with Purely Diffuse Scatterers .....	91
8.2.1 Equilibrium Experiments .....	92
8.2.2 Isotherms .....	92
8.2.3 Isobars .....	95
8.2.4 Kinetics of Desorption .....	97
8.3 Measurement of Relative Changes of the Sticking Probability	98
<b>References .....</b>	<b>101</b>
<b>Subject Index .....</b>	<b>107</b>
