

Contents

A Model for a Dia-Electric By H. Narnhofer and W. Thirring	1
Potential Models for Quarkonium Systems By H. Grosse	4
Some New Bounds on the Number of Bound States By K. Chadan and R. Kobayashi (With 1 Figure)	14
Moment Inequalities and a Martin Conjecture By A.K. Common	20
On a Class of Spectral Problems Admitting Partial Algebraization By G. Auberson	26
High Energy Theorems By S.M. Roy and V. Singh	38
Complex Angular Momentum Analysis in Axiomatic Quantum Field Theory By J. Bros and G.A. Viano (With 4 Figures)	53
Inverse Scattering Revisited: Explicit Solution of the Marchenko-Martin Method By N.N. Khuri	77
The Inverse of an Inverse Problem By J. Leon and P.C. Sabatier	98
Weak-Star Compactness and Its Relevance to Analyticity Problems By M. Ciulli, S. Ciulli, and T.D. Spearman (With 4 Figures)	102
Variational Improvement of Perturbation Theory and/or Perturbative Improvement of Variational Calculations By A. Neveu	126

A New Method for QCD Sum Rules: The L^∞ Norm Approach	
By G. Mennessier, M.B. Causse, and G. Auberson (With 5 Figures)	137
Bifurcation Theory Applied to Chiral Symmetry Breaking	
By D. Atkinson	158
On the Scaling Behavior of the $O(N)$ σ-Model	
By B. Bonnier and M. Hontebeyrie	163
A Conjecture on the Possible Exact (1+1)-Dimensional Solutions to the Discrete Boltzmann Models I	
By H. Cornille	168
Are Heavy Higgs Interactions Observable at the 100 GeV Scale?	
By G. Gounaris, F.M. Renard, and D. Schildknecht (With 6 Figures)	188
Geometric Approaches to Particle Physics	
By F. Scheck (With 1 Figure)	202
Index of Contributors	217
Subject Index	219
