

# Contents

<b>1. Introduction</b>	1
<b>2. Phenomenologic Theory of Magnetism and Classification of Magnetic Solitons</b>	4
2.1 Magnetization. Landau–Lifshitz Equations.	4
2.2 Magnetic Properties of Weak Ferromagnets	7
2.3 Domain Walls	13
2.4 Bloch Lines and Points	16
2.5 Effective Equations of the Dynamics of WFM Magnetization	21
<b>3. Experimental Methods of Investigation of the Domain Wall Dynamics in Ferromagnets</b>	28
3.1 The Faraday Effect in Orthoferrites, Garnets and Iron Borate	28
3.2 Magnetooptical Observation of Domains and Domain Walls in Ferromagnets	35
3.3 The Sixtus–Tonks Method	37
3.4 Method of the Bubble Domain Collapse	38
3.5 Magnetooptical Method of Recording the Domain Wall Transit Time	38
3.6 Method of High-Speed Photography	40
3.7 Method of Double High-Speed Photography	42
3.8 Optical Doppler Effect from the Moving Domain Wall	44
<b>4. Main Features of Stimulated Motion of Domain Walls</b>	47
4.1 Mobility of a Domain Wall	47
4.2 Magnetoelastic Anomalies in the Dynamics of Domain Walls in Orthoferrites	50
4.3 Dynamics of Domain Walls in Iron Borate	53
4.4 Limiting Velocity	55
4.5 Elementary Theoretical Analysis	59

<b>5. Magnetoelastic Interaction and Dynamics of Domain Walls</b>	64
5.1 Magnetoelastic Interaction and Cherenkov Emission of Phonons	65
5.2 Simplest Theory of Magnetoelastic Gap	75
5.3 Shock Wave Excitation under the DW Motion	80
5.4 DW Retardation due to Shock Wave Excitation	85
<b>6. Stability and Probabilistic Description of DW Motion</b>	87
<b>7. Microscopic Theory of Relaxation of Domain Walls</b>	96
7.1 General Considerations	96
7.2 Intrinsic Relaxations	98
7.3 Impurity Relaxation in Orthoferrites with Rare-Earth Ions	110
<b>8. Non-one-Dimensional Dynamics of Domain Walls in Weak Ferromagnets</b>	113
8.1 Non-one-Dimensionality of Supersonic Dynamics of Domain Walls in Orthoferrites	113
8.2 Kinks on the Domain Wall in Orthoferrites	118
8.3 Irreversibility of Nearsonic Dynamics of Domain Walls in Orthoferrites	121
8.4 Dissipative Structures in Supersonic Motion of Domain Walls in Orthoferrites	122
8.5 Relaxation of the Non-one-Dimensionalities on the Moving Domain Wall in Yttrium Orthoferrites	125
8.6 The Nonlinear Magnetoelastic Wave in Iron Borate	127
<b>9. Dynamics of Bloch Lines and Their Clusters</b>	131
9.1 Gyroscopic Dynamics of VBL	132
9.2 Experimental Methods of Recording the Bloch Lines	138
9.3 Registration of Dynamic VBL by the Method of High-Speed Photography	142
9.4 Soliton-Like Behaviour of VBL Clusters	153
<b>References</b>	168
<b>Subject Index</b>	179
