

Contents

Karl-Heinz Zschau

Liquid-Phase Epitaxy of GaAs and the Incorporation of Impurities 1

Raymond Dingle

Confined Carrier Quantum States in Ultrathin Semiconductor Heterostructures 21

Gottfried Landwehr

Quantum Transport in Silicon Inversion Layers 49

J. Frederick Koch

The Dynamics of Conduction Electrons in Surface Space Charge Layers 79

Erio Tosatti

Electronic Superstructures of Semiconductor Surfaces and of Layered Transition-Metal Compounds 113

Sokrates T. Pantelides

Theory of Impurity States in Semiconductors 149

John Sandercock

Some Recent Applications of Brillouin Scattering in Solid State Physics 183

Ruprecht Haensel

Synchrotron Radiation in Solid State Physics 203

Joachim Hesse and Horst Preier

Lead Salt Laser Diodes 229

Hans Günter Danielmeyer

Stoichiometric Laser Materials 253
