

Contents

<i>K. Funke</i> Elementary Steps of Cation Motion in AgI-Type Solid Electrolytes	1
<i>H.-J. Stöckmann, P. Heitjans, H. Ackermann</i> Internal Fields, Defects, and Motions, Studied by Nuclear Methods	19
<i>P. Rabe, R. Haensel</i> The Extended X-Ray Absorption Fine Structure and its Applicability for Structural Analysis	43
<i>U. Kaufmann, J. Schneider</i> Optical and ESR Spectroscopy of Deep Defects in III–V Semiconductors	87
<i>J. Pollmann</i> On the Electronic Structure of Semiconductor Surfaces, Interfaces and Defects at Surfaces or Interfaces	117
<i>W. Göpel</i> Charge Transfer Reactions on Semiconductor Surfaces	177
<i>G. A. Rozgonyi</i> Laser Annealing of Semiconductors	229
<i>A. Heuberger, H. Betz, S. Pongratz</i> Present Status and Problems of X-Ray Lithography	259
<i>S. Geckeler</i> Problems of Transmitters and Receivers in Fibre-Optic Communication Systems	315
<i>H. Walther</i> Laser Investigations in the Atmosphere	327
<i>D. Haarer</i> Optical and Photoelectric Properties of Organic Charge Transfer Crystals	341
	VII

<i>G. Nimtz, B. Schlicht</i> Experiments Concerning the Magnetic Field Induced Wigner Condensation in Semiconductors	369
<i>T. M. Rice</i> Charge Density Waves in Transition Metal Compounds	393
<i>N. Grewe, H. J. Leder, P. Entel</i> Results and Problems in the Theory of Intermediate Valence Compounds	413
<i>T. D. Schultz</i> Open Questions in the Physics of Quasi-One-Dimensional Metals	463
