

## Contents

<i>Klaus Sattler</i> <b>The Physics of Microclusters</b>	<b>1</b>
<i>Helmut Büttner, Heinz Bilz</i> <b>Nonlinear Structures in Solid State Physics</b>	<b>13</b>
<i>Günther Bauer, Wolfgang Jantsch, Eike Bangert</i> <b>Band Edge Structure of Ferroelectric IV-VI Compounds</b>	<b>27</b>
<i>Donald R. Huffman</i> <b>Optical Absorption Studies of Surface Plasmons and Surface Phonons in Small Particles</b>	<b>49</b>
<i>Ulrich Bonse</i> <b>Synchrotron X-Rays for Solid State Physics</b>	<b>77</b>
<i>Paul Ziemann</i> <b>Ion Implantation – A Modern Tool of Solid State Physics</b>	<b>93</b>
<i>Heinrich Kurz</i> <b>Fundamentals of Pulsed Laser Annealing</b>	<b>115</b>
<i>Elisabeth Bauser</i> <b>Crystal Growth from the Melt</b>	<b>141</b>
	<b>VII</b>

<i>Heribert Wagner, Harald Ibach</i> <b>Hydrogen and Oxygen Bonding on Silicon Surfaces</b>	165
<i>Gary W. Rubloff</i> <b>Microscopic Properties and Behavior of Metal/Semiconductor Interfaces</b>	179
<i>Gottfried H. Döhler</i> <b>n-i-p-i Doping Superlattices – Tailored Semiconductors with Tunable Electronic Properties</b>	207
<i>Nuyen T. Linh</i> <b>The Two-Dimensional Electron Gas and its Technical Applications</b>	227
<i>Werner Hagen, Rainer E. Lambrich, Johannes Lagois</i> <b>Semiconducting Gas Sensors</b>	259
<i>Wolfgang Heinke</i> <b>The Use of Semiconductors in Motor Vehicles</b>	275
<i>Andreas Schlachetzki</i> <b>Optical Communication – Glass Fibres and Semiconductors</b>	295
