Plenary talks

Jens Als-Nielsen

Liquid Surfaces Studied by Synchrotron X-Ray Radiation 1

Richard M. Martin

Ab Initio Total Energy Methods in Semiconductor Physics 3

Berni J. Alder

Dynamics Simulation of Simple Liquids 19

Mildred S. Dresselhaus

Layered Crystals and Intercalated Compounds 21

Hans Werner Diehl, Siegfried Dietrich

Static and Dynamic Critical Behavior at Surfaces 39

Gérard Toulouse

Statistical Mechanics of Disorder and Applications to Complex Problems 53

Heinz-Otto Peitgen, Peter H. Richter

Fractals and Phase Transitions 55

Turbulence, Chaos and Nonlinear Dynamics

Serge Aubry, Laurent de Seze

Dynamics of a Charge-Density Wave in a Lattice 59

B. A. Huberman

The Dynamics of Complexity 71

Pierre Atten

Electrohydrodynamic Instabilities and Transition to Turbulence 73

Alejandro Muramatsu, Francisco Guinea, Vincent Hakim

Critical Behaviour of Dissipative Quantum Systems 75

Heikki M. Isomäki, Juhani von Boehm, Raimo Rätty

Chaotic Motion of an Impact Oscillator 83

<i>Hervé Kunz, Yves Rossier</i>	
The Anharmonic Oscillator with a Randomly Modulated Frequency	91
<i>Nice Terzi</i>	
Phonon Coherent States and Response Functions of Harmonic Polarizable Crystals	97

Liquid Helium

<i>Peter Wölfle</i>	
The Quantum Liquids ^3He and ^4He	105
<i>S. Balibar, F. Gallet, E. Rolley, P. E. Wolf</i>	
Roughening Transition and Helium Crystals	113

Molecular Dynamics of Liquids

<i>J. P. Hansen</i>	
Phase Separation in Charge-Stabilized Colloidal Dispersions	117
<i>Raymond Kapral</i>	
Dynamics of Chemical Reactions in Dense Systems: Scaling and Mode Coupling	119
<i>Gian Giuseppe Bentini</i>	
Surface Oxidation Induced by Laser Irradiation in Semiconductors	121

Clusters and Microcrystals

<i>Constance J. Nelin, Paul S. Bagus</i>	
Electronic Structure of Clusters: Model Studies of Core Level Binding Energy Shifts	135
<i>José M. Soler, Juan J. Saénz, Nicolás García</i>	
Monte Carlo and Molecular Dynamics Studies of Microclusters	143
<i>B. Ubbo Felderhof</i>	
Dielectric Properties of Suspensions	151

One-Dimensional Conductors

<i>Jörg Fink</i>	
Electronic Structure of Conducting Polymers	157

<i>Gert Jan Kramer, Hans B. Brom, L. Jos de Jongh, Jan L. de Boer</i> Nonlinear Conductivity in the Organic Semiconductors (MEM) _{1-x} (METM) _x (TCNQ) ₂	167
<i>Karlheinz Seeger, Werner Mayr, Alfred Philipp</i> Tunneling of Charge Density Waves in Transition Metal Trichalcogenides	175

Ab-Initio Calculations

<i>Ole H. Nielsen</i> Ab Initio Calculations of Elastic and Electronic Properties of Semiconductors..	181
<i>Raffaele Resta</i> Microscopic Electronic Screening in Semiconductors	183
<i>Jean Pol Vigneron</i> Force Calculations in Solids	195

Heavy Fermions

<i>Peter Fulde</i> Quasiparticles in Heavy Fermion Systems	207
<i>Kazuo Ueda, T. Maurice Rice</i> Heavy Electron Superconductors	209
<i>Øystein Fischer</i> Magnetic-Field-Induced Superconductivity	217
<i>Giovanni Vignale, Kundan S. Singwi</i> Possibility of Superconductivity in the Electron-Hole Liquid	219

Spin Glasses

<i>Jacques Villain</i> The Random Field Ising Model	221
<i>Imre Kondor</i> Towards a Field Theory of Spin Glasses	225
<i>Olof Beckman</i> Relaxation in Spin Glasses	233
<i>Lun Biao Xu, Qing Jian Yang, Jian Bo Zhang</i> Spin Glasses: The Quantum Statistical Model and its Solutions	239
<i>Bedřich Velický, Jan Mašek, Giorgio Paolucci, Vladimír Cháb, Mark Surman, Kevin C. Prince</i> ARUPS Studies of the Electronic States of Disordered, Semimagnetic, Semiconducting Cd _{1-x} Mn _x Te	247

Spin Polarization Effects

- Henri-Jean Drouhin, Claudine Hermann, Georges Lampel*
Polarized Photoemission in GaAs: Spin Relaxation Effects 255
- Ulrich Heinzmann*
Relativistic Effects in Electronic Structure of Solids 265
- Henning Riechert, Santos F. Alvarado*
Spin Precession and Polarization of Conduction Electrons in the Band-Bending
Region of GaAs (110) 267

Excitons and Polaritons, High Excitation

- Jean-Claude Merle*
The Efficiency of Resonant Light Scattering on Excitons 275
- Arne Stahl*
Coherence and Saturation of Exciton Polaritons in Semiconductors 287
- Rainer G. Ulbrich*
Band Edge Spectra of Highly Excited Gallium Arsenide 299
- Max Schubert, Bernd Wilhelmi*
Measurement and Computer Simulation of Some Basic Ultrafast Processes . . . 309

Physics of Devices

- Karl Hess*
Principles of Hot Electron Thermionic Emission (Real Space Transfer) in
Semiconductor Heterolayers and Device Applications 321
- Peter G. LeComber*
Applications of Amorphous Silicon in Electronic Devices 329
- Helen Prance, Robert J. Prance, John E. Mutton, Timothy P. Spiller,
Terence D. Clark, Richard Nest*
Quantum Mechanical Duality in SQUID Rings and the Design and Operation
of a Quantum Mechanical Voltmeter 337

Optoelectronics

- David Cotter*
Nonlinear Optical Effects in the Applications of Optical Fibers 347

<i>Herbert Burkhard</i>	
Quaternary Semiconductor Lasers	349
<i>Peter Günter</i>	
Dielectric Materials for Phase Conjugation and Optical Image Processing	363

Superlattices – Heterojunctions

<i>Manijeh Razeghi</i>	
Frontiers of Semiconductor Superlattice Growth	371
<i>Massimo Altarelli</i>	
Subband Dispersion and Landau Levels in Semiconductor Heterojunctions and Superlattices	381
<i>G. Bastard</i>	
Energy Levels and Charge Transfer in Modulation-Doped Heterostructures . . .	389

Quantum Hall Effect

<i>János Hajdu</i>	
The Theory of the Quantum Hall Effect – Its Present State	395
<i>Albert M. Chang</i>	
Fractional Quantum Hall Effect	405
<i>Robert Joynt</i>	
Semiclassical States in the Quantum Hall Effect	413
<i>Reinout Woltjer, Jo Mooren, Jean-Pierre André, Günter Weimann</i>	
Four-Terminal Quantum Hall and Shubnikov-De Haas Measurements with Pulsed Electric Fields	419

2-Dimensional Systems, Disorder and Localization

<i>Detlef Heitmann</i>	
Spectroscopy on Two-Dimensional Electron Systems	429
<i>Rudolf Herrmann</i>	
The 2-Dimensional Electron Gas in Bicrystals	437
<i>Brian K. Ridley</i>	
The Electron-Phonon Interaction in Quantum Wells: Antiscreening and Slab Modes	449

<i>Reinder Coehoorn, Auke A. van Heuzen, Cor Haas, George A. Sawatzky</i> A Critical Comparison of Angle Resolved Photoemission Spectra with Calculated Band Structures of Layered Compounds	459
<i>Yvan Bruynseraede, Martin Gijs, Christiaan van Haesendonck</i> Experiments on Electron Localization and Interactions in Two-Dimensional Metal Films	465
<i>Kuljinder S. Chase, Angus MacKinnon</i> Statistics and Scaling of Two-Dimensional Resistances	475
<i>Emil Babić, Krešimir Šaub</i> Coherent Effects in Conductivity of Glassy ZrCu Alloys	485

Semiconductor Surfaces

<i>Göran V. Hansson, Anders S. Flodström</i> Photoemission Studies of Semiconductor Surfaces with Synchrotron Radiation	493
<i>Pietro Chiaradia, A. Cricienti, G. Chiarotti, F. Ciccacci, S. Selci</i> Anisotropic Reflectivity of Surface States in Semiconductors	505
<i>Harald Ibach</i> Surface Phonons	507

Surfaces

<i>Michel A. Van Hove</i> Low-Energy Electron Diffraction – Experiment and Theory	517
<i>J. Friso van der Veen, Joost W. M. Frenken</i> Ion Beam Crystallography of Solid and Molten Surfaces	523
<i>Charles M. Falco</i> Metallic Multilayers and Superlattices	531
<i>Pietro Ballone, Giorgio Pastore, Mauro Rovere, Mario P. Tosi</i> Structure and Crystallization of the 2D Classical Electron Fluid	539
<i>Robert Feidenhans'l, Jakob Bohr, Mourits Nielsen, Michael Toney, Robert L. Johnson, Francois Grey, Ian K. Robinson</i> Solving Surface Structures with X-Ray Diffraction	545
<i>Volker Dose</i> Empty Electronic States at Clean and Adsorbate Covered Surfaces	555

Defects in Semiconductors

<i>Peter Vogl</i> Transition-Metal Impurities in Semiconductors	563
<i>Reinhard Helbig</i> "Simple" Acceptors B, Al, Ga, In, Tl in Silicon	573
<i>R. A. Stradling</i> The Use of Hydrostatic Pressure and Alloying to Introduce Deep Levels in the Forbidden Gap of InSb, GaAs, and $\text{Ga}_{1-x}\text{Al}_x\text{As}$	591
<i>Ronald C. Newman</i> Boron Impurity Antisite Defects in GaAs and GaP	605
<i>J. Martin Spaeth, Bruno K. Meyer</i> Optically Detected Magnetic Resonance of Anion Antisite Defects in GaAs and GaP	613
<i>Eicke R. Weber, Pär Omling</i> Antisite Defects and EL2 in GaAs	623

Light Scattering

<i>Miles V. Klein</i> Raman Scattering in Superconductors	637
<i>Wolf von der Osten</i> Light Scattering in Silver Halides	643
<i>Eberhard Zirngiebl, Stefan Blumenröder, Gernot Güntherodt, Aiyasami Jayaraman, Bertram Batlogg, Marc Croft</i> Raman Scattering in Rare Earth Intermetallic Compounds: Direct Observation of Intra- and Inter-Configurational Excitations in an Intermediate Valence Compound	651

Nuclear Methods, X-Ray Scattering

<i>Gero Vogl, Winfried Petry</i> Diffusion in Metals Studied by Mößbauer Spectroscopy and Quasielastic Neutron Scattering	655
<i>Jørgen Kjems, Torsten Freltoft</i> Fractal Structures Studied by Small-Angle X-Ray and Neutron Scattering	669
<i>Pekka Hautojärvi, Asko Vehanen</i> Characterization of Atomic Defects by Positron Annihilation	677

<i>Bruno Dorner, Thomas Benda, Eberhard Burkel, Johann Peisl</i> Inelastic X-Ray Scattering with Very High Resolution	685
<i>Adalberto Balzarotti, Marek T. Czyzyk, Andrzej Kisiel, Paola Letardi, Nunzio Motta, Marek Podgórný, Marta Zimnal-Starnawska</i> EXAFS of Cd_{1-x}Zn_xTe: A Test of the Random Distribution in Zincblende Ternary Alloys	689

Tunneling

<i>Roy F. Willis, M. C. Payne, J. B. Pethica, M. D. Pashley, J. H. Coombs</i> Vacuum Tunneling Microscopy – A Status Report	699
<i>Markus Büttiker, Rolf Landauer</i> Traversal Time for Tunneling	711

Metalphysics, Creep and Fracture

<i>Bernhard Ilchner</i> Phenomena and Mechanisms of Deformation by Creep of Crystalline Solids . . .	719
--	-----

Biophysics, Membranes

<i>Evan A. Evans</i> Molecular Structure and Viscoelastic Properties of Biomembranes	735
<i>Roland Benz</i> Structure and Dynamics of Nerve Membranes	747
<i>Lajos Keszthelyi</i> Charge Transport through Membranes	757

Contents of volumes published previously

(Festkörperprobleme vol. I ... XXV)	759
