

# Contents

<i>Hermann Grabert and Helmut Wipf</i> <b>Tunneling of Hydrogen in Metals</b> .....	1
<i>Klaus von Klitzing</i> <b>Ten Years Quantum Hall Effect</b> .....	25
<i>Markus Büttiker</i> <b>Edges, Contacts and the Quantized Hall Effect</b> .....	41
<i>Bernhard Kramer</i> <b>Quantum Transport in Thin Films and Inversion Layers</b> .....	53
<i>Ulrich Merkt</i> <b>Quantum Dots on Indium Antimonide</b> .....	77
<i>Hilbert von Löhneysen</i> <b>The Metal-Insulator Transition in Si:P</b> .....	95
<i>Gert Denninger</i> <b>Nuclear Spins as Probes for Conduction Electrons</b> .....	113
<i>Gerhard Pensl and Reinhard Helbig</i> <b>Silicon Carbide (SiC) – Recent Results in Physics and in Technology</b> .....	133
<i>Dietrich Haarer</i> <b>Photoconductive Polymers: A Comparison with Amorphous Inorganic Materials</b> .....	157
<i>Lothar Pintschovius</i> <b>Lattice Dynamics and Electron-Phonon Coupling in High-<math>T_c</math> Superconductors</b> .....	183
<i>Hartmut Zabel</i> <b>X-Ray and Neutron Scattering at Thin Films</b> .....	197
<i>Helmut Sitter and Wolfgang Faschinger</i> <b>Atomic Layer Epitaxy of II–VI Compound Semiconductors</b> .....	219

<i>Jürgen Christen</i> <b>Characterization of Semiconductor Interfaces with Atomic Scale Resolution by Luminescence .....</b>	<b>239</b>
<i>Ernst O. Göbel</i> <b>Ultrafast Spectroscopy of Semiconductors .....</b>	<b>269</b>
<i>Roland Zimmermann</i> <b>The Dynamical Stark Effect of Excitons .....</b>	<b>295</b>
<i>Wolfgang Elsässer</i> <b>Nonlinear Optical Phenomena in Semiconductor Lasers .....</b>	<b>321</b>
<i>Claus Klingshirn</i> <b>Nonlinear Optics and Dynamics in Passive Semiconductors .....</b>	<b>335</b>
<i>Hartmut Haug</i> <b>Nonlinear Dynamics of Optical Semiconductor Systems .....</b>	<b>359</b>
<i>Albert Brandl and Wilhelm Prettl</i> <b>Current Filaments and Nonlinear Oscillations in n-GaAs.....</b>	<b>371</b>
<i>Rudolf P. Huebener</i> <b>Self-Organized Structures of the Electronic Transport in Semiconductors .....</b>	<b>387</b>
<i>Andrew Blakers</i> <b>High Efficiency Crystalline Silicon Solar Cells .....</b>	<b>403</b>
<i>Manfred Fähnle, Thomas Holey, Ulrich Staaden and Peter Braun</i> <b>Monte Carlo Renormalization Group Study of the Site-Diluted Simple Cubic Ising-Model .....</b>	<b>425</b>
