

Contents

<i>P. Müller</i> Intrinsic Josephson Effects in Layered Superconductors	1
<i>M. Cardona</i> Semiconductor Crystals with Tailor-Made Isotopic Compositions	35
<i>C. Zimmermann, A. Hemmerich, and T. W. Hänsch</i> Generation of Blue and Ultraviolet Light by Frequency Doubling of Semiconductor Laser Radiation	51
<i>K. Nakano and A. Ishibashi</i> Blue-emitting Laser Diodes	65
<i>S. Strite</i> The III-V Nitride Semiconductors for Blue Light Emission: Recent Progress and a Critical Evaluation of their Potential in Comparison to the ZnSe Based II-VI Semiconductors	79
<i>K. Jäger-Hezel</i> Developments for large-scale production of high-efficiency silicon solar cells	97
<i>J.H. Werner, R. Bergmann, and R. Brendel</i> The Challenge of Crystalline Thin Film Silicon Solar Cells	115
<i>H. W. Schock</i> CuInSe ₂ and Related Materials for Thin Film Solar Cells	147
<i>C. Chapelier, D. Mailly, and A. Benoit</i> Experimental Observation of Persistent Currents in GaAs- GaAlAs Single Loops	163
<i>W. Häusler</i> Strongly Correlated Confined Electrons	171
<i>R. Schuster and K. Ensslin</i> Antidot Superlattices: Classical Chaos and Quantum Transport	195
<i>R.J. Haug</i> Nonlinear Transport Spectroscopy on Quantum Dots	219
<i>T. Ruf, J. Spitzer, V.F. Sapega, V. I. Belitsky, M. Cardona, and K. Ploog</i> Raman Scattering by Acoustic Phonons in Semiconductor Superlattices	237
<i>S. W. Koch and F. Jahnke</i> Nonequilibrium Many-Body Effects in Semiconductor Microlasers	259
<i>D. Gerthsen, K. Tillmann, and M. Lentzen</i> Structural Properties of lattice-mismatched Compound Semiconductor Heterostructures	275

H.G. Roskos

Coherent Emission of Electromagnetic Pulses from Bloch Oscillations in Semiconductor Superlattices.....	297
Contents of Volumes 30-34	317
