

# Contents of Volume 2

<i>Contents of volumes 1–4</i> . . . . .	v
<i>Foreword to volume 2</i> . . . . .	ix
<i>Contents of volume 2</i> . . . . .	xiii
<i>Contributors to volume 2</i> . . . . .	xiv
1. Y. Petroff	
<i>Optical properties of semiconductors above the band edge</i> . . . . .	1
2. G.A. Thomas and V.B. Timofeev	
<i>A review of <math>N = 1</math> to <math>\infty</math> particle complexes in semiconductors</i> . . . . .	45
3. R.F. Wallis and C.A. Sébenne	
<i>Optical properties of semiconductor surfaces</i> . . . . .	65
4A. D.E. Aspnes	
<i>Modulation spectroscopy/electric field effects on the dielectric function of semiconductors</i> . . . . .	109
4B. M.L. Cohen and D.J. Chadi	
<i>Temperature dependence of semiconductor band states</i> . . . . .	155
4C. G. Martinez	
<i>Optical properties of semiconductors under pressure</i> . . . . .	181
5. C.R. Pidgeon	
<i>Free carrier optical properties of semiconductors</i> . . . . .	223
6. M. Voos, R.F. Leheny and J. Shah	
<i>Radiative recombination</i> . . . . .	329
7. Y. Marfaing	
<i>Photoconductivity, photoelectric effects</i> . . . . .	417
8. M. Balkanski	
<i>Optical properties due to phonons</i> . . . . .	497
9. D.S. Chemla and J. Jerphagnon	
<i>Nonlinear optical properties</i> . . . . .	545
<i>Author index</i> . . . . .	599
<i>Subject index</i> . . . . .	627
