

Contents

Glossary of Terms	1	Aggregate Molding Materials	208
Introduction and Historical Development	13	Bonds Formed in Molding Aggregates	212
<i>Section Chairman: Joseph R. Davis, ASM International</i>		Resin Binder Processes	214
History of Casting	15	Sand Molding	222
Development of Foundry Technology in the		Bonded Sand Molds	222
United States	24	Unbonded Sand Molds	230
Casting Advantages, Applications, and Market Size	37	Coremaking	238
Principles of Liquid Metal Processing	47	Plaster Molding	242
<i>Section Chairman: Seymour Katz, General Motors Research Laboratories</i>		Ceramic Molding	248
Introduction	49	Investment Casting	253
Principles of Physical Chemistry	50	Replicast Process	270
Thermodynamic Properties of Aluminum-Base and		Rammed Graphite Molds	273
Copper-Base Alloys	55	Permanent Mold Casting	275
Thermodynamic Properties of Iron-Base Alloys	61	Die Casting	286
Composition Control	71	Centrifugal Casting	296
Gases in Metals	82	Horizontal Centrifugal Casting	296
Inclusion-Forming Reactions	88	Vertical Centrifugal Casting	300
Principles of Solidification	99	Continuous Casting	308
<i>Section Chairmen: W. Kurz, Swiss Federal Institute of Technology; D.M. Stefanescu, The University of Alabama</i>		New and Emerging Processes	317
Nucleation Kinetics	101	Counter-Gravity Low-Pressure Casting	317
Fundamentals of Growth	109	Directional and Monocrystal Solidification	319
Basic Concepts in Crystal Growth and Solidification	109	Squeeze Casting	323
Solidification of Single-Phase Alloys	114	Semisolid Metal Casting and Forging	327
Solidification of Eutectics	119		
Appendix 1: Simplified Theory of Eutectic Growth	124	Foundry Equipment and Processing	339
Appendix 2: Eutectic Growth at Very High		<i>Section Chairman: Thomas Prucha, CMI International</i>	
Solidification Rates	125	Sand Processing	341
Solidification of Peritectics	125	Green Sand Molding Equipment and Processing	341
Columnar to Equiaxed Transition	130	Sand Reclamation	351
Microsegregation and Macrosegregation	136	Melting Furnaces	356
Behavior of Insoluble Particles at the		Electric Arc Furnaces	356
Solid/Liquid Interface	142	Induction Furnaces	368
Low-Gravity Effects During Solidification	147	Reverberatory Furnaces and Crucible Furnaces	374
Solidification of Eutectic Alloys	159	Cupolas	383
Aluminum-Silicon Alloys	159	Vacuum Melting and Remelting Processes	393
Cast Iron	168	Vacuum Induction Melting (VIM)	393
Interpretation and Use of Cooling Curves		Vacuum Induction Remelting and Shape Casting	399
(Thermal Analysis)	182	Electroslag Remelting (ESR)	401
Patterns	187	Vacuum Arc Remelting (VAR)	406
<i>Section Chairman: Robert Voigt, The University of Kansas</i>		Vacuum Arc Skull Melting and Casting	409
Patterns and Patternmaking	189	Electron Beam Melting and Casting	410
Molding and Casting Processes	201	Plasma Melting and Casting	419
<i>Section Chairman: Thomas S. Piwonka, The University of Alabama</i>		Degassing Processes (Converter Metallurgy)	426
Classification of Processes and Flow Chart of		Argon Oxygen Decarburization (AOD)	426
Foundry Operations	203	Vacuum Oxygen Decarburization (VODC)	429
		Degassing Processes (Ladle Metallurgy)	432
		Vacuum Ladle Degassing (VD)	432
		Vacuum Oxygen Decarburization (VOD)	434
		Ladle Furnace and Vacuum Arc Degassing	
		(LF/VD-VAD)	435
		Vacuum Induction Degassing (VID)	438
		Plasma Heating and Degassing	440
		Nonferrous Molten Metal Processes	445

Automatic Pouring Systems	497	Nonferrous Casting Alloys	741
Processing of Castings	502	<i>Section Chairman: Elwin L. Rooy, Aluminium Company of America</i>	
Shakeout and Core Knockout	502	Aluminum and Aluminum Alloys	743
Blast Cleaning of Castings	506	Copper and Copper Alloys	771
Welding of Cast Irons and Steels	520	Zinc and Zinc Alloys	786
Hot Isostatic Pressing of Castings	538	Magnesium and Magnesium Alloys	798
Coating of Castings	544	Cobalt-Base Alloys	811
Testing and Inspection of Casting Defects	561	Nickel and Nickel Alloys	815
Foundry Automation	566	Titanium and Titanium Alloys	824
Design Considerations	575	Zirconium and Zirconium Alloys	836
Riser Design	577	Cast Metal-Matrix Composites	840
Gating Design	589	Computer Applications in Metal Casting	855
Casting Design	598	<i>Section Chairmen: John T. Berry, The University of Alabama; Robert D. Pehlke, The University of Michigan</i>	
Dimensional Tolerances and Allowances	614	Introduction	857
Ferrous Casting Alloys	625	Modeling of Solidification Heat Transfer	858
<i>Section Chairmen: D.M. Stefanescu, The University of Alabama; Norman Lillybeck, Deere and Company</i>		Modeling of Fluid Flow	867
Classification of Ferrous Casting Alloys	627	Modeling of Combined Fluid Flow and Heat/Mass Transfer	877
Gray Iron	629	Modeling of Microstructural Evolution	883
Ductile Iron	647	Metric Conversion Guide	893
Compacted Graphite Irons	667	Abbreviations and Symbols	896
High-Alloy White Irons	678	Index	899
Malleable Iron	686		
High-Alloy Graphitic Irons	698		
Plain Carbon Steels	702		
Low-Alloy Steels	715		
High-Alloy Steels	722		
Cast Alnico Alloys	736
