Preface	xiv

Section I: Heat Transfer Mechanisms

1. Fundamentals of Momentum and Heat Transfer	3
<i>N. P. Cheremisinoff</i>	
2. Scaling in Laminar and Turbulent Heat and Mass Transfer	83
<i>E. Ruckenstein</i>	
3. Heat Flux in the Benard-Rayleigh Problem	125
<i>M. Zamora, A. Cordoba, and A. Rey de Luna</i>	
4. Hydrodynamics of Free-Liquid Jets and Their Influence on Heat Transfer	151
<i>J. Iciek, U. Cywinska, and R. Blaszczyk</i>	
5. Natural Convection Heat Transfer to Power-Law Fluids	183
<i>A. V. Shenoy</i>	
6. Natural Convection in Evaporating Droplets	211
<i>W. J. Yang</i>	
7. Principles of Heat and Mass Transfer with Liquid Evaporation	231
<i>T. Kumada</i>	
8. Bubble Nucleation, Growth, and Departure in Boiling Heat Transfer	261
<i>R. Cole</i>	

9. Forced-Convection Boiling in Uniformly Heated Channels ...	303
<i>Y. Katto</i>	
10. Transient-Boiling Heat Transfer Under Forced Convection ...	327
<i>I. Kataoka and A. Serizawa</i>	
11. Prediction of Heat Transfer During Forced-Convection Subcooled Boiling	385
<i>M. M. Shah</i>	
12. Liquid Metal Heat Transfer in Turbulent Pipe Flows	405
<i>S. L. Lee</i>	
13. Mixed Convection in Buoyant Plumes	429
<i>N. Afzal</i>	
14. Nucleation and Growth in the Diffusion Cloud Chamber	487
<i>R. H. Heist</i>	
15. Convective and Radiative Heat Transfer of Flowing Gaseous-Solid Suspensions	523
<i>S. Hasegawa, R. Echigo, and A. Shimizu</i>	
16. Heat Transfer in Gas-Solid Fluidized Beds	559
<i>W. E. Genetti</i>	
17. Gas Convection and Unsteady Conduction in Fluid-Bed Heat Transfer	581
<i>R. L. Adams</i>	
18. Heat Transfer Between Tubes and Gas-Solid Fluid Beds	609
<i>N. S. Grewal</i>	
19. Periodic Heat Transfer Through Inhomogeneous Layers	645
<i>A. K. S. Thakur</i>	
20. Heat Flux Measurements	665
<i>M. Zamora and A. Rey de Luna</i>	

Section II: Industrial Operations and Design

21. Heat Transfer and Hydrodynamics of Two-Phase Annular Flow	681
<i>K. Suzuki</i>	
22. Flow-Regime Mapping for Condensation Inside Horizontal Tubes	719
<i>C. P. Gupta, H. K. Varma, and T. N. Tandon</i>	
23. Heat Transfer and Pressure Drop Across Finned Tubes	747
<i>K. Hashizume</i>	
24. The Performance of Extended-Surface Heat Exchangers	767
<i>B. M. Johnson</i>	
25. Vibration Effects on Natural-Convection Heat Transfer from Fins	807
<i>P. K. Nag</i>	
26. Numerical Modeling of Heat Exchangers	815
<i>W. T. Sha</i>	
27. Numerical Simulation of Shell-Side Flow and Temperature Distribution in Heat Exchangers	853
<i>H. deBruijn and W. Zijl</i>	
28. Thermal and Hydraulic Design of Hairpin and Finned-Bundle Heat Exchangers	889
<i>G. P. Purohit</i>	
29. Economics of Shell-and-Tube Heat Exchangers	905
<i>G. P. Purohit</i>	
30. Countercurrent Condensation Drobbble Column	923
<i>B. Sudhoff, A. Steiff, and P. M. Weinspach</i>	
31. Design and Scale-Up for Heat Transfer to Coils in Agitated Vessels	965
<i>M. Bruxelmane and H. Desplanches</i>	

32. Estimation of Heat Losses from Flows in Buried Pipes	1009
<i>H. H. Bau</i>	
33. Principles of Evaporative Cooling and Heat Transfer Augmentation	1025
<i>W. Leidenfrost and B. Korenic</i>	
34. Cooling Tower Operations	1065
<i>N. P. Cheremisinoff</i>	
35. Mechanisms of Quenching Surfaces	1103
<i>R. A. Nelson</i>	
36. Heat Transport in Nuclear Reactor Channels	1155
<i>J. Lach, M. Kielkiewicz, and M. Kosinski</i>	
37. Thermal Drying Equipment	1211
<i>P. N. Cheremisinoff</i>	
38. Spray Drying	1243
<i>P. N. Cheremisinoff and J. M. Phelps</i>	
39. Ceramic Spray Drying	1255
<i>J. M. Phelps and O. Ratsep</i>	
40. Optimizing in a Class of Dispersed-Material Drying Operations	1265
<i>S. Sieniutycz</i>	
41. Three-Dimensional Modeling of Flow, Heat Transfer, and Combustion	1303
<i>B. H. Hjertager</i>	
42. Design Practices in Combustion and Incineration	1351
<i>K. Banerjee, P. N. Cheremisinoff, and N. P. Cheremisinoff</i>	
43. Design Guidelines for Flare Gas Practices	1401
<i>K. Banerjee, P. N. Cheremisinoff, and N. P. Cheremisinoff</i>	
Index	1433
