Preface . . . . . *xi*

Section

FUNDAMENTALS 1

Tables, Symbols, and Abbreviations

1a. Published Electrical Standards and Graphical Symbols for Industrial Equipment. 1b. Electrical Diagrams. 1c. Log Tables, Trigonometric Tables, Trigonometric Identities, Derivatives, Integrals, and Series. 1d. Laplace Transforms and Inverse. 1e. Physical Constants and Factors.

Mathematics

1f. Logarithms, Alignment Charts, Binary Mathematics and Conversion, Algebra, Trigonometry, Calculus. 1g. Heaviside Operators and Laplace Transforms. 1h. Desk Calculating Machines. Binary Mathematics and Conversion. 1i. Feedback-control-system Theory.

Physical Laws

1j. Statics. 1k. Mechanics of Solids. 1l. Fluid and Gas Flow. Heat Transfer. 1m. Chemical Principles. 1n. Light and Optics. 1o. Basic Electrical Theory.

CONTROL ELEMENTS 2

Electrical Control Elements

2a. Electrical References. 2b. Conductors, Connectors, and Insulators. 2c. Resistors. 2d. Capacitors. 2e. Transformers and Inductors. 2f. Electron Tubes: General Considerations. 2g. Mech-

Section

anisms of Electron Emission. 2h. Electron Tubes: Basic Phenomena of Electron Flow. 2i. High-vacuum Triodes and Multigrid Tubes, Photoelectric Tubes and Multipliers, and Cathode-ray Tubes. 2j. Gas-filled Tubes. 2k. Microwave Tubes. 2l. Semiconductors. 2m. Transistors. 2n. Magnetic Amplifiers. 2o. Relays and Limit Switches. 2p. Magnetic Contactors and Basic Motor-control Circuits. 2q. Rotary Electrical Equipment. 2r. Generator-Motors, Tachometer Generators, and Rotating Regulators. 2s. Electric-friction Clutches and Brakes. 2t. Eddy-current and Magnetic-particle Apparatus.

Mechanical, Hydraulic, and Pneumatic Control Elements

2u. Mechanical Control Elements. 2v. Hydraulic and Pneumatic Control Elements. 2w. Transducers.

POWER SUPPLIES, CONSTANT POTENTIAL 3

Rectifiers and D-C Supplies

3a. Low-power Conversion. 3b. Equipment for Electrostatic Applications. 3c. X-ray Circuits and Applications. 3d. Mechanical, Metallic, and Special Rectifiers. 3e. Mercury-arc Power Rectifiers. 3f. Primary Batteries. 3g. Storage Batteries.

A-C Supplies

3h. Oscillators. 3i. Mechanical-Electrical Vibrators. 3j. Non-sinusoidal Oscillators, Special Waveforms.

Plant-system Characteristics

3k. General Power Supplies. 3l. Special Power Supplies.

Hydraulic and Pneumatic Power Supplies

3m. Fluid Systems. 3n. Flow and Pressure.

CONTROL CIRCUITS 4

4a. A-C Amplifiers. 4b. D-C Amplifiers. 4c. Detectors and Phase Discriminators. 4d. Phase-shift Circuits for Gas Tubes. 4e. Gating Circuits. 4f. Timing Circuits. 4g. Mechanical Timers.

CIRCUIT APPLICATIONS 5

5a. Electronic Relays. 5b. Heating, Lighting, and Welding Control. 5c. High-frequency Heating.

Regulators and Servos

5d. Stabilizing Means. 5e. Voltage Regulators, Power-factor Regulators, and Load Regulators. 5f. Control of Two-phase A-C

Section

Motors. 5g. Control of D-C Motors. 5h. Special Motor-control Systems. 5i. Photoelectric, Tracer, Numerical Contouring, and Numerical Positioning Systems. 5j. Hydraulic and Pneumatic Control Circuits. 5k. Process Controllers. 5l. Air Gaging.

INSTRUMENTS AND COMPUTERS 6

Instruments

6a. Regulated Electric-power Supplies. 6b. Direct-current Vacuum-tube Voltmeters. 6c. Alternating-current Vacuum-tube Voltmeters. 6d. Graphic Recorders: Oscillographs. 6e. Servo-operated Graphic Recorders and Function Plotters. Strain Gages. 6f. Cathode-ray Oscillographs and Electronic Switches. 6g. Stroboscopes and High-speed Photography. 6h. Instruments for Servo Phase-shift Attenuation. 6i. Radiation Survey Meters. 6j. Gaging by Radiation Methods. Nondestructive Testing. 6k. Mass Spectrometry. 6l. Vacuum-tube Testing. 6m. Low-frequency Test Oscillators.

Computers

6n. Analog Computers. 6o. Digital Computers.

EQUIPMENT MECHANICAL DESIGN 7

7a. Signal-power-level Considerations. 7b. Radio Interference. 7c. New Production Techniques. 7d. Human Engineering. 7e. Design Fundamentals for Accessories and Auxiliary Devices Used with Electronic Control. 7f. Automation Today. 7g. Factory Testing. 7h. Field Testing.

USERS' REQUIREMENTS 8

8a. Requirements of Various Industries. 8b. Design for Environmental Conditions. 8c. Military Requirements. 8d. Special Design Requirements for Standard, Off-the-shelf Electronic Controlled Devices. 8e. British Practice in Industrial Electronics. 8f. French Requirements and Practices.

LETTERS PATENT IN THE UNITED STATES 9

TECHNICAL INFORMATION SOURCES 10

Index follows Section 10.
