Pion nucleon scattering

Subvolume b1: Tables of data

0 Introduction	1
1 Tables of data	2
1.1 General remarks	2
1.2 Survey indices	3
1.2.1 List of experiments	3
1.2.2 Survey index for differential cross sections and polarizations	10
1.3 Total cross sections	29
1.3.1 Total $\pi^+ p$ cross sections	29
1.3.2 Total $\pi^- p$ cross sections	30
1.4 Differential cross sections	31
1.4.1 Differential cross sections for $\pi^+ p$ elastic scattering	31
1.4.2 Differential cross sections for $\pi^- p$ elastic scattering	148
1.4.3 Differential cross sections for $\pi^- p$ charge-exchange scattering	277
1.5 Polarization parameters	323
1.5.1 Polarization parameters for $\pi^+ p$ elastic scattering	323
1.5.2 Polarization parameters for $\pi^- p$ elastic scattering	364
1.5.3 Polarization parameters for $\pi^- p$ charge-exchange scattering	375
1.6 Spin-rotation parameters R and A	391
1.6.1 R parameter for $\pi^- p$ elastic scattering	391
1.6.2 R parameter for $\pi^+ p$ elastic scattering	391
1.6.3 A parameter for $\pi^- p$ elastic scattering	391
1.7 Literature on pion nucleon scattering experiments	392
1.8 Other compilations of pion nucleon scattering data and reports on related topics	400

Subvolume b2: Analyses, tables of amplitudes

2 Results of phenomenological analysis

- 2.1 Methods of partial wave and amplitude analysis
- 2.2 Tables of pion nucleon scattering amplitudes
- 2.3 Tables of measurable quantities reconstructed from phase shifts
- 2.4 Further results derived from πN partial waves
- 2.5 Applications of πN and $\pi\pi NN$ amplitudes
- 2.6 Analysis of high energy data

3 Bibliography

Appendix

- 1. Kinematics
- 2. Scattering amplitudes
- 3. Expansions of scattering amplitudes
- 4. Measurable quantities
- 5. Unitarity

Note: Please delete asterisk and footnote on p. 31 of subvolume I/9b 1 and place them on p. 148 instead.

6. Symmetries and analytic properties of invariant amplitudes
7. Analytic properties of partial wave amplitudes
8. Low energy models
9. Regge models
10. Isospin bounds
11. Electromagnetic nucleon and pion form factors
